Ann Leighton

A CURIOUS HERBAL,

Containing

FIVE HUNDRED CUTS,

of the most useful Plants,

which are now used in the Practice of

PHYSICK.

Engraved on folio Copper Plates,

after Drawings, taken from

the LIFE.

By

Elizabeth Blacknell.

To which is added

a short Description of ye Plants;

and

their common Uses in PHYSICK.

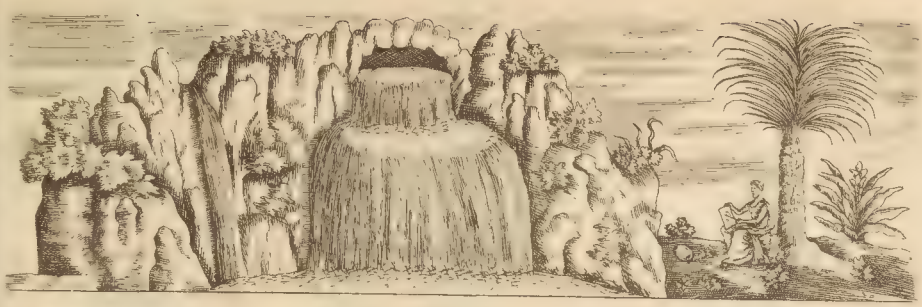
Vol: II.

LONDON

Printed for JOHN NOURSE at the Lamb without

Temple Bar, MDCCXXXIX.

1734



Vol: 2.

Plate 253. Avens, or Herb-Bennet. Caryophyllata.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, & ye Flowers yellow.
2. It grows in Woods & Hedges, flowring great part of the Summer.
3. The Roots are accounted cephalic and alexipharmic, cordial & chearing to ye Spirits, when infused in Wine. They are good for Pains arising from Cold or Wind in the Bowels, and are useful for all Kinds of Fluxes.
4. Greek, Latin, Caryophyllata vulgaris. Spanish, Italian, Garofanata. French, Benoiste. German, Benedictenwurt. Dutch, Nagelkruyd.

Plate 254. Bistort, or Snakeweed. Bistorta.

1. The Stalks grow a Foot and an half high, the Leaves are a dark grass Green on the Face, and a willow Green on the Back.
2. It grows in moist Meadows, particularly Battersea, and flowers in May.
3. The Roots are esteem'd drying and binding, and useful in all Fluxes and Haemorrhagies, the Incontinence of Urine and making of bloody Water; and are serviceable in pestilential Fevers.
4. Greek, Latin, Bistorta radice minus intorta. Spanish, Italian Bistorta. French, La Bistorte. German, Ratternwurt. Dutch, Naternwortel.

Plate 255. Creeping Birthwort. Aristolochia clematitis

1. The Stalks grow about two Foot high, the Leaves are a yellow grass Green, and the Flowers a dull Yellow.
2. It is a native of Spain and Italy, and flowers here in May.
3. The Roots are accounted opening and attenuating, good to cleanse the Stomach and Lungs of tough Phlegm, promote the Menses, the Lochia, and the Birth.
4. Greek, Ἀριστολοχία Κληματῖτις. Latin, Aristolochia clematitis recta. Spanish, Astronomia. Italian, Aristolochia. French, Aristoloche. German, Osterlucen. Dutch, Lange en dunne Holwortel.

Plate 256. Round Birthwort. Aristolochia rotunda.

1. The Stalks of this grow less than the former; the Leaves are like the other; and the Flowers a deep Purple.
2. It grows in the same Countries, and flowers here in May.
3. The Root is esteem'd good to purge choleric and phlegmatic Humors, provoke the Catamenia, force away the Birth and After-Birth, and ease the after-Pains. Outwardly it is good to draw out Splinters and broken Bones, and Heal foul eating Ulcers.
4. Greek, Ἀριστολοχία στρογγυλή. Latin, Aristolochia rotunda flore ex purpura nigro. Spanish, Astronomia. Italian, Aristolochia. French, Aristoloche. German, Holwurtz. Dutch, Ronde Holwortel.

Plate 257. Long Birthwort. Aristolochia longa.

1. The Stalks grow about two Foot high, the Leaves are a yellow grass Green, and the Flowers a dull Yellow.
2. It grows in Spain, Italy & ye Southern Parts of France, flowring here in May.
3. The Roots are accounted opening and attenuating, good to cleanse ye Lungs from tough Phlegm, promote the Menses and the Birth. & expel the Afterbirth.- Outwardly they are used to dry & cleanse foul Ulcers. The Root is one of the Ingredients in the Theriaca Andromachi.
4. Greek, Ἀριστολοχία μακρὰ. Latin, Aristolochia longa vera. Spanish, Astronomia. Italian, Aristologia longa. French, Aristologie. German, Lang Holwurtz. Dutch, Lange Holwortel.

Plate 258. Wild Clary. Horminum sylvestre.

1. The Stalks grow near two Foot high, the Leaves are a dull blue Green, and the Flowers blue.
2. It grows in gravelly Grounds, flowring in May & June.
3. It is esteem'd warming & drying, good to comfort a cold windy Stomach, strengthen the Reins, help ye Fluor albus, and invigorate a cold relax'd Womb. The Seed of this Plant are remarkable to cleanse the Eyes from Redness, Inflammations, or Specks.
4. Greek, Ὁρμινον ἄγριον. Latin, Occulus Christi. Spanish, Italian, Horminio salvatico. French, German, Bilde Salben. Dutch,

---

Plate 259. Marsh Crow-foot. Ranunculus palustris.

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It grows in Ditches and watery Places, flowring in May.
3. This Plant is of a hot caustic Nature, and blisters with more violence than Cantharides.- The Root dryed & powdered provokes sneezing, when snuffed up the Nose, and helps to cleanse the Head.
4. Greek, Βατράχιον. Latin, Ranunculus Apii folio laevis. Spanish, Yerva belida. Italian, Ranoncolo. French, Grenoilette. German, Wasser Hanenfuss. Dutch,

---

Plate 260. Water-Cress. Nasturtium aquaticum.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows in Ditches and Rills of Water, flowring in June.
3. The Leaves are said to consist of fine volatile Parts, being warming and opening good in all scorbutic Cases, as also the stone, Gravel & Jaundice. It is much eat as a Sallad in the Spring.
4. Greek, Καρδαμον. ἔνυδρον. Latin, Nasturtium aquaticum supinum. Spanish, Rabacas. Italian, Sio falso. French, Berle. German, Welsomen. Dutch, Waterkerse.

Plate 261. Bastard Acorus. Acorus adulterinus.

1. The Stalks grow to be three or four Foot high, the Leaves are a grass Green, and the Flowers Yellow.
2. It grows in Ditches and watery Places flowring in May & June.
3. The Roots are accounted restringent, drying and binding, good in all kinds of Fluxes. Some commend them as good to strengthen the Brain and Nerves.
4. Greek, Ψευδοάκορον. Latin, Pseudo-Acorus, & Gladiolus luteus. Spanish, Italian, Giglio giallo. French, Flambe de Rivieres. German, Geel Schwertel. Dutch, Geele Lisch.

Plate 262. Rhapontic. Rhaponticum.

1. The Stalk grows about three Foot high, the Leaves are a deep grass Green, and the Flowers whitish.
2. It is planted in Gardens and flowers in May.
3. The Root purges less than that of the true Rhubarb; but is accounted more restringent, and good in Fluxes, Spitting of Blood, making of Bloody Water, and Weakness of the Stomach. It is one of the Ingredients in the Theriaca Andromachi.
4. Greek, Latin, Lapathum praestantissimum, Rhabarbarum officinarum dictum. Spanish, Italian, French, German, Dutch,

---

Plate 263. Navelwort. Cotyledon.

1. The Stalk grows about a Foot high, the Leaves are a light grass Green and the Flowers a whitish Green.
2. It grows upon old Stone Walls and Buildings, flowring in May.
3. The Leaves are esteem'd cooling & moistning good in Diseases of the Liver, provoking Urine & taking off the sharpness of it.- Outwardly applied, the Juice helps the Shingles, St Anthony's Fire, the Pain and Inflammation of the Piles; & eases Kibes & Chilblains.- It is an Ingredient in the Unguentum Populeon.- The Herb Folks too frequently impose the Frog-bit and the Marsh Pennywort, neither of which are used in the Shops, upon their unwary Customers instead of this Plant.
4. Greek, Κοτυλήδων ἡ δὲ κυμβάλιον. Latin, Umbilicus Veneris. Spanish, Scudettes. Italian, Bellico di Venere. French, Escudes. German, Nabel Graut. Dutch, Navelkruyd.

Plate 264. Godt's=thorn. Tragacantha.

1. This Plant rarely comes to any considerable Height here, the Leaves are a blue Green & the Flowers white.
2. It grows in the Southern Parts of France and Italy, but produces its Gum in the more Eastern Countries.
3. The Gum Dragon of the Shops comes from the Root of this Plant, being of a glutinous Nature, good to correct the Acrimony & Sharpness of Humours, easing Coughs, Hoarsness, and Catarrhous Defluxions. Outwardly it is used in Collyriums for hot inflam'd Eyes.
4. Greek, Τραγάκανθα. Latin, Tragacantha. Spanish, Alquetira. Italian, Tragacantha. French, Barbe Renard. German, Dragant. Dutch, Gum Dragon Boom.

Plate 265. Staves=acre. Staphis agria.

1. The Stalks grow about two Foot high, the Leaves are a deep Green, and the Flowers a blue Purple.
2. It is a native of Italy, and flowers here in Iune.
3. The Seed powdered is commended by Sylvius de la Boe, from gr XII to a Scruple in a Dose, to purge upwards & downwards, and cause a great Flux of Spittle, being serviceable against the Lues Venerea. Some use it in Gargarisms for the Tooth-Ach; and the Vulgar use it to kill Lice; from which it has the Name of Louseworth.
4. Greek, Σταφὶς ἀγρία. Latin, Staphis agria. Spanish, Fabaraz. Italian, Stafusaria. French, Herbe aux Poux. German, Bissmunk. Dutch, Luyskruyd.

Plate 266. Wild Rocket. Eruca sylvestris.

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It grows upon old Walls, as on the Walls of the City of London, and flowers several Months in the Summer.
3. The Whole Plant is accounted hot, dry, and diuretic, & a provocative to Venery. Matthiolus prefers this before ye Garden Rocket. See Plate 242.
4. Greek, Εὔζωμον ἄγριον. Latin, Eruca sylvestris major lutea caule aspero. Spanish, Arugua. Italian, Rucola salvatica. French, Roquette sauvage. German, Wild Weiss Scuff. Dutch, Bilde Rakette.

Plate 267. Sassafrass. Sassafras.

1. This grows to be a large Tree in the West Indies, the Leaves are a grass Green and the Flowers yellow.
2. It is a native of Virginia, and flowers here in April.
3. The Root and Bark are accounted heating and drying, good for the Scurvy, Gout and Dropsy, and are commonly an Ingredient in Dyet Drinks for the Lues Venerea. The Tea made of the shavings is much drank for catarrhous Defluxions and shortness of Breath. The Officinal Preparations are the Electuarium e Sassafras & the Chimical Oil.
4. Greek, Latin, Arbor ex Florida Ficulneo folio. Spanish, Italian, French, German, Dutch,

---

Plate 268. Spatling Poppy. Behen album.

1. The Stalks grow about two Foot high, the Leaves are a blue Green, and the Flowers white.
2. It grows in Meadows & Corn Fields, flowring in Iune.
3. The Root is esteem'd cordial, cephalic, alexipharmic, and a Provocative to Venery.
4. Greek, Λυχνὶς ἀγρία. Latin, Lychnis sylvestris. Spanish, Italian, Lichnide coronaria. French, German, Margenrossin. Dutch, Witte Been.

Plate 269. Dragons. Dracontium.

1. The Stalk grows near three Foot high, the Leaves are a Shining grass Green, and the Flowers green on the outside and Purple within.
2. It is planted here in Gardens, and flowers in Iune.
3. This Plant is accounted alexipharmic, good in malignant contagious Distempers, and pestilential Fevers; and is very useful to drive any thing out from the Heart, for which it is given in the small Pox & Measles.
4. Greek, Δρακοντία μικρὰ. Latin, Dracunculus polyphyllus. Spanish, Taragontia. Italian, Dragontea. French, Petite Serpentaire. German, Gross Schlangenkraut. Dutch, Dragon.

Plate 270. Small Blue-Bottle. Cyanus minor.

1. It grows near two Foot high, the Leaves are a willow Green, and the Flowers a fine Blue.
2. It grows amongst the corn, and flowers in Iune & Iuly.
3. The Leaves and Flowers are said to have the same Vertues as those of the great Blue-Bottle. see Plate 66. Some commend the Distill'd Water of the Flowers for sore, inflam'd, and bloodshot Eyes. The Infusion and Powder of the Flowers, are given as a Remedy against the Jaundice.
4. Greek, Κύανος μικρὸς. Latin, Cyanus segetum. Spanish, Italian, Fior menore. French, German, Kornblum. Dutch, Koorn-bloem.

Plate 271. Wild Valerian. Valeriana sylvestris.

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, and the Flowers a pale Red.
2. It grows in Woods, flowring in May and Iune.
3. This Plant is much used for Diseases of the Head and all nervine Affections. Columna commends the Powder of the Root as good for the Epilepsy. Some Physicians prescribe Tea made from the Roots, as a good Medicine for ye above mention'd Distemper, after proper Evacuations.
4. Greek, Φοῦ μικρὸν. Latin, Valeriana sylvestris major, foliis angustioribus. Spanish, Yerva beneditta. Italian, Valeriana minore. French, Valerienne des prez. German, Gemein Baldrian. Dutch, Weild Valeriana.

Plate 272. Golden Starwort. Aster Atticus luteus.

1. It grows about a Foot and an half high, the Leaves are a dull grass Green, and the Flowers yellow.
2. It is a Native of Italy and Spain, and is planted here in Gardens flowring in Iune.
3. The Ancients held this Plant in great Esteem for Buboes & swellings in the Groin, the Leaves being applyed as a Cataplasm, and affirm that holding them only in the Hand will dissipate those Swellings, which is hardly to be credited.
4. Greek, Ἀστὴρ ἀττικὸς ὕπωκρος. Latin, Aster luteus, foliolis ad florem rigidis. Spanish, Italian, Asteratico. French, Petit Mugue. German, Stern Kraut. Dutch,

Plate 285. Red Currans. Ribes

1. It grows to be five or six Foot high, the Leaves are a dark grass Green & the Flowers a very light Green.
2. It is planted in Gardens, and flowers in April
3. Currans are accounted cooling and grateful to the Stomach, good to quench Thirst, & are somewhat restringent. A Jelly made of the Juice and Sugar is cooling and good in Fevers.
4. Greek, Latin, Ribesia, & Grossularia non Spinosa. Spanish, Italian, Ribes. French, Ribettes. German, S. Johanns Treublein. Dutch, Roode Alheesien.

Plate 286. Herb Paris. Herba Paris.

1. The Stalks grow about eight Inches high, the Leaves are a deep grass Green, & the Flowers a light Green with yellow Stamina.
2. It grows in moist shady Woods, particularly in a Wood, by the Bog at Chiselhurst in Kent; at the Entrance of it next the Town. It flowers in April and May, and the Berry is ripe in July.
3. Fuchsius accounted this Plant of a poisonous Nature; but later Writers esteem it a counter Poison, and alexipharmic, good in malignant and pestilential Fevers. Parkinson says the Roots boil'd in Wine help the collic, and the Leaves applyed outwardly, repress Tumours and Inflammations especially in the Scrotum and Testicles.
4. Greek, Latin, Solanum quadrifolium bacciferum. Spanish, Italian, Herba Paris. French, Raisin de Renard. German, Sternkraut. Dutch,

---

Plate 287. Purslain. Portulaca.

1. The Stalk grows near a Foot high, the Leaves are a reddish Green, and the Flowers yellow.
2. It is sown in Gardens, and flowers in July.
3. The Leaves are esteem'd cooling, good for the Scurvy, the Heat of the Bile, Heat of Urine, Strangury and a Gonorrhea. The Seed is cooling and restringent, good to kill Worms.
4. Greek, Ἀνδράχνη. Latin, Portulaca latifolia, seu sativa. Spanish, Verdolagas. Italian, Porcellana. French, Porcelaine. German Burkelcraut. Dutch, Porceleyn.

Plate 288. Fennel. Foeniculum.

1. The Stalks grow about three or four Foot high, the Leaves are a dark Green, and the Flowers yellow.
2. It is commonly planted in Gardens, flowering in June; but it grows wild between Woolwich and Gravesend.
3. The Root is accounted aperitive & diuretic, opening Obstructions of the Liver, Spleen, & Kidneys, provoking Urine & ♀ Menses, helping the Dropsy & Jaundice, boil'd in Water Gruel & drank in a Morning. The Leaves are said to encrease Nurses Milk & strengthen the Sight, and are good for the Stone and Gravel. The Seed is carminative, expelling Wind, strengthening the Bowels and helping the Collic. Officinal Preparations are, a Simple Water from the Leaves, and a Distill'd Oil from the Seeds.
4. Greek, Μάραθον. Latin, Foeniculum vulgare Germanicum. Spanish, Funco. Italian, Finocchio. French, Fenoel. German, Fenchell. Dutch, Denkel.

Plate 297. Eryngo. Eryngium.

1. It grows about a Foot high; the Leaves are a very light Green, and the Flowers blue.
2. It grows by the Sea Side in Sandy Places, & flowers in June & July.
3. The Roots are accounted hepatic & diuretic, good to Open Obstructions of the Liver, help the Jaundice, provoke Urine, and ease the Strangury. Candied with Sugar, they are taken for Consumptions, especially such as come by too much Venery, being reckon'd great strengtheners to the Parts of Generation, taking off the Heat of Urine that attends the Lues Venerea.
4. Greek, ηρυγγιον. Latin. Eryngium maritimum. Spanish, Cardo corredor. Italian, Iringo marino. French, Paracault. German, Brachen Distel. Dutch, Gruys distel.

Plate 298. Camomile. Chamaemelum.

1. It grows about eight Inches long; the Leaves are a grass Green, and the Flowers white set round a yellow Thrum.
2. It grows upon Heaths and Commons, flowring in June and July.
3. It is esteem'd good for the Stomach, Colic, Jaundice, Stone, stoppage of Urine, and Quartan Agues. Outwardly it is used in Glysters, Baths, & Semicupia, for the Stone and stoppage of Urine, as also in Fomentations for Inflammations and Tumors. When applyed hot to the Sides it helps ye Pains thereof. The Officinal Preparations are, the Simple Water, the Aqua Chamaemeli composita, the distill'd Oil, and the Oil by Infusion or Decoction.
4. Greek, Ἀνθεμις. Latin, Chamaemelum nobile. Spanish, Manzanilla. Italian, Camamilla. French, Camomille. German, Camillen. Dutch, Roomse Camille.

Plate 299. Vipers-Bugloss. Echium.

1. The Stalks grow about a Foot high, the Leaves are a deep grass Green, and the Flowers a blue Purple, with red Stamina.
2. It grows in Meadows, and flowers in July.
3. The Leaves and Flowers are used, and accounted good for the Bites of Vipers and other Venemous Creatures.
4. Greek, Ἔχιον. Latin, Echium vulgare. Spanish, Yerva della bivora. Italian, Echio. French, Bugloßa sauvage. German, Wild Ochentung. Dutch, Bilde Oßetungen.

Plate 300. Sweet Maudlin. Ageratum

1. The Stalks grow about a Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It is a native of Italy and the Warm Countries, being planted here in Gardens, and flowers in July.
3. It is esteem'd warming and drying, good for Disorders of the Stomach and Liver, it helps the Jaundice and Obstructions of the Menses, provokes Urine and kills Worms; and is much used at present in the Shops.
4. Greek, Ἀγήρατον. Latin, Ageratum foliis serratis. Spanish, Italian, Herba Giulia. French, German, Frembd Lebercraut. Dutch, Kleyne Balsam.

2. It grows on Commons and Heaths, and flowers in July.
3. The Roots are accounted good for Worms, especially the Lumbricilati. Some make a kind of Pot-Ash from the Stalks & Leaves burnt.
4. Greek, Πολυποδιον. Latin, Filix ramosa major, pinnulis obtusis, non dentatis. Spanish, Italian, Felce femina. French, Fengiere German, Farn. Dutch, Daren Dyfken.

Plate 326. Madder. Rubia tinctorum.

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It is planted in Fields and Gardens, and flowers in May.
3. The Roots are esteem'd opening and attenuating, and good for the Jaundice, Dropsy, Stone and Strangury, & to dissolve congeal'd Blood. Some use them in Wounds and Contusions. The Dyers use the Roots to dye red with.
4. Greek, Ερυθροδανον. Latin, Rubia tinctorum sativa. Spanish, Ruvia. Italian, Robbia. French, Garence. German, Ferberrat. Dutch, Meekrab.

Plate 327. The Willow. Salix.

1. The officinal Willow is ye largest of the Common Willows, & has long Narrow Leaves, green above and whitish underneath.
2. It grows commonly in moist Places, & bears Catkins in April.
3. The Juli, Leaves and Bark, are said to be cooling and binding, & good for all kinds of Fluxes and Haemorrhagies. The Sap that comes from ye wounded Bark is accounted good for inflam'd & bloodshot Eyes.
4. Greek, Ιτεα. Latin, Salix vulgaris alba, arborescens. Spanish, Salce. Italian, Salcio. French, Saulx. German, Felbinger. Dutch, Wilge Boom.

Plate 328. The Ash. Fraxinus.

1. This Tree grows to a great Height, the Leaves are a dull Green, and the Catkins a yellow Green.
2. It grows in Woods & Hedges, & the Catkins come out in March & April.
3. The outer Bark is accounted good for the Spleen, the Stone and the Gravel; and the inner Bark is used with good Success, in foreign Parts, against intermitting Fevers.- The Leaves are used for the Biting of all venemous Creatures.- The Seed, called Lingua avis, is heating and drying, and helps the Disorders of the Liver & Spleen, provokes Urine eases the Stone, and Pains in the Side.
4. Greek, Μελια. Latin, Fraxinus excelsior & Fraxinus. Spanish, Frasno. Italian, Frassino. French, Fresne. German, Eschenbaum. Dutch, Essenboom.

Plate 329. Melon. Melo.

1. The Stalks of this Plant trail on the Ground, like those of a Cucumber; the Leaves are a yellowish Green, & the Flowers yellow.
2. It is planted here in Gardens, flowring in June, the Fruit being ripe in July and August.
3. The Seed is one of the greater cold Seeds, and is commonly used in Emulsions, being cooling, & useful in Fevers and other inflammatory Distempers; it also helps the Stone, Strangury and Heat of Urine. Doctor Boerhave says, that the Meat of the Melon is warming, and aromatic, but advices to eat it moderatly and fasting, because it is apt otherways to force bloody Urine, & adds vix aliquid plus in Venerem Stimulat.
4. Greek, Μῆλον. Latin, Melo vulgaris. Spanish, Melon. Italian, Mellone. French, Melon. German, Melon. Dutch, Popone.

Plate 330. Chesnut. Castanea.

1. This Tree grows to a large Size; the Leaves are a deep grass Green, and the Flowers a pale Red, with yellow Stamina.
2. It is planted generally in Walks, for its beautiful Shade; the Catkins come out early in the Spring, & the Fruit is ripe in August & September.
3. The Fruit is much eat in the Warm Countries for Food; the inward Skin of the Fruit is said to be good for all kinds of Fluxes, either of Blood or Humours.
4. Greek, Κάσαυα. Latin, Castanea sativa. Spanish, Castaño. Italian, Castagne. French, Chataigner. German, Kesten. Dutch, Castanje Boom.

Plate 331. Tamarisk. Tamariscus.

1. This grows to be a large Tree in the Warm Countries; the Leaves are a light grass Green, and the Flowers have a blush of red.
2. It is planted here in Gardens; the Catkins come out in the Spring, & are succeeded by small Seeds included in a down.
3. The Leaves, Bark and Wood are used, being accounted Specific for all Disorders of the Spleen; and the Bark is said to be very good for the Rickets in Children.
4. Greek, Μυρίκα. Latin, Tamarix Gallica. Spanish, Tamarisco. Italian, Tamarigio. French, Tamaris. German, Tamaristen. Dutch, Tamaris.

Plate 332. Sparagus. Asparagus.

1. The Stalks grow about four Foot high; the Leaves are a deep grass Green, and the Flowers greenish, which are succeeded by red Berries.
2. It is planted in Gardens, and flowers in July.
3. The Root is one of the five opening Roots, & is esteem'd good for all Obstructions of the Reins & Bladder; as also the Dropsy and Jaundice. The young Shoots, which we call Sparagus, are pleasant & Wholsome Food, being of a cleansing Nature, and light Disgestion, provoking Urine, to which they give a foetid Smell.
4. Greek, Ἀσπαραγός. Latin, Asparagus sativus. Spanish, Esparragos. Italian, Asparago. French, Asperges. German, Spargen. Dutch, Aspergies.

Plate 333. The Succotrine Aloe. Aloe Succotrina.

1. The Stalks grow about three Foot high, the Leaves are a blue Green, and the Flowers a light Red.
2. It is a Native of the East Indies, and flowers here in December.
3. The best Aloes of this Species comes over in skins from the Island Succotora. - Aloes is a great Ingredient in most of the officinal Pills, being accounted a good Stomatic, and useful to carry off tough & slimy Humors from the Bowels. Outwardly it is used for fresh Wounds, a little of the fine Powder being put in them.
4. Greek, Ἀλόνν. Latin, Aloe succotrina, angustifolia spinosa, flore purpureo. Spanish, Azibar Cicotrino. Italian, Aloè. French, Aloes. German, Aloën. Dutch, Aloe.

Plate 334. Jews Ears. Auricula Judae.

1. This fungous Excrescens is wrinkled, & turn'd up like an Ear; and is whitish on the outside & black within, with several little Veins.
2. It grows on the Trunk of the Elder.
3. Jews Ears are esteem'd good for the swelling and Inflammation of the Tonsils, sore Throats and Quinseys.
4. Greek. Latin, Auriculae Judeorum. Spanish, Orejas de las Judias. Italian, Orecchia di Judeas. French, Oreilles des Juifs. German, Dutch,

---

Plate 335. Tree Lungwort. Muscus Pulmonarius

1. This Moss has wrinkled tough Leaves, greenish above, & Ash-colour'd underneath.
2. It grows upon the Trunk of the Oak.
3. It is accounted good to stop inward Bleeding, & the too great Flux of the Menses. The common People use it for all Disorders of the Lungs & Breast, boiling it in Pectoral Drinks, & making Syrups of it. The German Ephemerides Anno 3. Obs. 290. commend it as an extraordinary Remedy for ye yellow Jaundice.
4. Greek. Latin, Lichen arborum. Spanish, Pulmonaria de Arbol. Italian, Pulmonaria. French, Pulmonaire d'Arbre. German, Lungencraut. Dutch, Lunge kruyd.

Plate 336. Ash-colour'd Liverwort. Lichen cinereus.

1. This Lichen is ash-colour above, and whitish underneath.
2. It grows on Barren Places and Heaths, and is in perfection in October.
3. This Plant is that which the great Doctor Mead has found out to be a Specific for the Cure of the Bite of a mad Dog; and is to be taken in the manner following, viz; Let the Patient be blooded at the arm nine or ten ounces. Take of the Herb call'd in Latin Lichen Cinereus Terrestris, in English Ash-colour'd Ground Liverwort, clean'd, dry'd, and powder'd, half an ounce. Of black Pepper powder'd, two drachms. Mix these well together, and divide the powder into four doses, one of which must be taken every morning, fasting, for four mornings successively in half a pint of cow's milk warm. After these four doses are taken, the Patient must go into the Cold Bath, or a cold spring or river, every morning fasting for a month, he must be dipt all over, but not stay in (with his head above water) longer than half a minute, if the water be very cold. After this he must go in three times a week for a fortnight longer.
4. Greek, Λειχὴν. Latin, Lichen terrestris cinereus. Spanish, Higadela. Italian, Lichene. French, Epatique. German, Stein Zebercraut. Dutch,

Plate 337. Coffee. Coffee.

1. This is a low Shrubby Tree or Bush, with Leaves like those of the Laurel, and Flowers like the Jasmine.
2. It grows in Arabia Felix; and flowers here in April and May.
3. The Coffee that is commonly drank, is made of the Berries of this Tree roasted; and is accounted good for those who are of a cold flegmatic Constitution. But for Persons of a thin hot and dry Temperament, the drinking it too much may bring on them Nervous Distempers.
4. Greek, Ευωνυμος. Latin, Euonimo similis Ægyptiaca, fructu Baccis Lauri simili. Spanish, Café. Italian, Caffè French, Caffe. German, Dutch,

---

Plate 338. The Clove. Caryophyllus aromaticus.

1. The Trunk of this Tree grows about the Bigness of a Man's Waist, the Leaves resemble those of ye Bay, in shape size and Colour; the Flower is red, and the Seed a reddish Brown.
2. It grows in the Molucca Islands, in the East Indies; and this Specimen was taken from a Branch of the Tree at Sr. Hans Sloan's.
3. Cloves are esteem'd heating, drying, cordial, cephalic and Stomatic; being good to stop Vomiting, strengthen a weak Stomach, expel Wind, prevent Fainting and malignant Distempers. The Distill'd Oyl is said to cure the Tooth-Ach, a Bit of Lint being dipp'd in it, and put into the Hollow Tooth.
4. Greek, Καρυόφυλλον. Latin, Caryophyllus. Spanish, Clavos. Italian, Garofoli. French, Girofle. German, Negelen. Dutch, Negelein.

Plate 339. The true Euphorbium. Euphorbium verum Antiquorum.

1. This Specimen was taken from a Plant in the Greenhouse in Chelsea Garden, about three Foot high, & much branch'd, answering the Description of that in Miller's Botanicum Officinale; the Stalks being triangular of a light grass Green, and very Prickly; the Flower is whitish, with a little tincture of Red on the Back of the Leaves.
2. It grows in Barbary and the East Indies.
3. This Plant is full of a caustic Milk, which when dryed is the Euphorbium of the Shops; being a violent Sternutatory, and is sometimes used in Apoplexies and Lethargies. - Outwardly it is used to clean foul and rotten Bones, and is put in to Drawing Plaisters.
4. Greek, Ευφόρβιον. Latin, Euphorbium. Spanish, Euphorbio. Italian, Euforbio. French, Euphorbe. German, Dutch,

Plate 341. Red Coral. Corallium rubrum.

1. This Plant spreads its Branches like a small Tree, and when growing the outside is whitish; the three separate Pieces are such as are commonly Sold in the Shops.
2. It grows upon the Rocks at the Bottom of the Tyrrhenian Sea, and on the Coasts of Spain and France; this Specimen was taken from a Branch in Mr. Nicholls's curious Collection.
3. Coral is esteemd. cordial drying & restringent, good to sweeten the Blood and free the Stomach from Acid Sour Juices; it stops all kinds of Fluxes and Haemorrhagies; & wherever an Alkali is necessary, this will do as much as any. The Officinal Preparation from Coral is, The Electuarum Diacorallion.
4. Greek, Κοράλλιον. Latin, Corallium rubrum majus. Spanish, Coral roxo. Italian, Corallo rosso. French, Corail rouge. German, Gorall. Dutch, Koraal.

Plate 342. True White Coral. Corallium verum album. White Coral of the Shops. Corallium Officinarum.

1. The true white Coral is never to be met with in the Shops, & rarely in any Cabinet; this Specimen was taken from a Branch in Sr. Hans Sloan's unparalleld Collection, & is Numbered 178. in his Cabinet; being one of the greatest Rarities there; the other Coral is the Corallium Officinarum of Lobel and C. Bauhin, but Tournefort makes it a Madrepora; this Specimen was taken from Mr. Nicholls's curious Collection; and was the Coral of ye Shops, in Lobel's time.
2. The true white Coral, grows in the Spanish West India Seas, & the other grows in the Mediterranean Seas.
3. White Coral is cooling and binding, good for the Heart-burn or any Disorders that proceed from sharp Acid Juices in the Stomach or Blood.
4. Greek, Κοράλλιον. Latin, Corallium verum album & Corallium Officinarum. Spanish, Coral blanco. Italian, Corallo bianco. French, Corail blanche. German, Gorall. Dutch, Koraal.

Plate 343. White Coral. Corallium album.

1. Both these Specimens are taken from Mr. Nicholls's curious Collection, and are what the Shops sell now; it is generaly gathered in little Pieces like these that are separate on the Plate.
2. Both these Sorts of Coral grow on the Rocks of the Western Ocean, & the Coast of France.
3. These Corals have the same Qualities as the former; and such Corals as are whitest and firmest in their Texture are esteemd the Best.
4. Greek, Κοράλλιον. Latin, Corallium album. Spanish, Coral blanco. Italian, Corallo bianco. French, Corail blanche. German, Gorall. Dutch, Koraal.

Plate 344. Black Coral. Corallium nigrum.

1. This Coral is of a shining black Colour, & very Smooth; and grows branchd. It is taken from a Piece in Sr. Hans Sloan's Cabinet & numbered 527.
2. It grows upon Rocks in the Sea near Massilia; according to Gerard.
3. The same Qualities are given to this as the others; but it is hardly to be met with in the Shops; which may be the Reason it is seldome prescribed.
4. Greek, Κοράλλιον. Latin, Corallium nigrum. Spanish, Coral negro. Italian, Corallo nero. French, Corail noir. German, Gorall. Dutch, Koraal.

Plate 345. Acacia. Acacia.

1. This grows to be a pretty big Tree; the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows in the Eastern Countries particularly in Ægypt.
3. The true Acacia of the Ancients is made from the Pods of this Tree, before they are ripe; and is accounted restringent, cooling & incrassiating, good against spitting of Blood & all kinds of Fluxes; but it is rarely to be met with in the Shops now a Days. Gum Arabick comes from this Tree, which is very serviceable in Coughs & the Heat of Urine.
4. Greek, Ακακία. Latin, Acacia foliis scorpioides leguminosae. Spanish, Italian, French, Acacia.
German, Schlehendorn. Dutch, Sleepruimen.

Plate 346. Lavender Cotton. Abrotanum foemina.

1. This is a shrubby Plant that keeps green all the Winter; the Leaves are a light willow Green, and the Flowers yellow.
2. It grows naturally in Italy & the Warmer Countries, flowring in July.
3. The Leaves and Flowers boiled in Milk, and taken fasting, are said to destroy Worms. The Ancients commend it, infused in Wine as good against Obstructions of the Liver, and the Jaundice.
4. Greek, Αβρότονον. Latin, Chamaecyparissus. Spanish, Abrotono. Italian, Herba Camphorata. French, German, Dutch,

---

Plate 347. The Camphore=Tree. Camphorifera.

1. It grows about the Bigness of a Walnut Tree; the Leaves are a dull Green, and the Fruit blackish.
2. This Specimen was taken from a Branch in Sr. Hans Sloan's Collection, but there was no Flower to it; its Native Country is Japan.
3. From this Tree comes the Camphire of the Shops, which is good in all malignant Distempers, taken inwardly. Outwardly it is used in all Inflammations Burns and Scalds.
4. Greek, Latin, Camphora. Spanish, Camphorado. Italian, French, Camphre. German, Gampffer. Dutch, Camphir.

Plate 348. Black Pepper. Piper nigrum.

1. This Plant grows like our large white Bindweed; the Leaves are a bright grass Green, and the Fruit a dark Brown.
2. It grows in the East Indies.
3. Pepper is heating and drying, good to expell Wind, & ease the Collic; it strengthens the Nerves, Head, and Sight. Pepper should never be Powdered fine, but grossly broken, when it is eaten with Food or used to Season it.
4. Greek, Πέπερι. Latin, Piper rotundum nigrum. Spanish, Pimiento nero. Italian, French, Poivre noir. German, Pfeffer. Dutch, Peper.

Plate 349. The Orange Tree. Aurantia.

1 This Tree grows pretty large in its Native Climates; the Leaves are a grass Green, and the Flowers white.
2. It grows in Spain, Italy and Portugal, and flowers all the Year.
3. The Sevil Orange is that which is used in the Shops; the Peel is accounted good to strengthen and warm the Stomach, prevent Nausea & Vomiting, and ease the Collick. The Juice is much used for the Scurvy and Burning Fevers. Officinal Preparations are, The Water distill'd from the Flowers, a Conserve of the Peel, The same candied, And a Syrup of the Juice.
4. Greek, Latin, Malus Aurantia major. Spanish, Naranjer. Italian, Aranci. French, Pomme D'Orenges. German, Pomerant. Dutch, Oranje.

Plate 350. Pockwood or Lignum Vitae. Guajacum.

1. This Tree grows about Thirty Foot high; the Leaves are a yellow Green, and the Flowers bluish; That Specimen mark'd 1 & 2. grows in Jamaica; and is taken from Sr Hans Sloan's; And that mark'd 3. 4. & 5. is taken from a young Plant in the Physick Garden which answers ye Description of that which Sr Hans Sloane calls the Porto Rico Sort.
2. The first Species grows in Jamaica, and the last in Brasile.
3. The Bark & Wood are good for the Dropsy, Gout, King's Evil and the Lues Venerea. The Gum is useful in Scorbutick Cases or any Breaking out of the Skin.
4. Greek, Latin, Lignum Vitae. Spanish, Italian, French, Guajac. German, Frantzosen-holtz. Dutch, Pokhout.

Plate 351. Green Tea. Thea, & Thea Sinensis.

1 This Shrub grows about five Foot high; the Leaves are a deep Green, and ye Flowers a pale Red; this Specimen was taken from a Branch that Sr Hans Sloan has.
2. It grows in China, and flowers for several Months in the Summer.
3 This Tea is accounted good to purify the Blood, promote Digestion, strengthen the Head, provoke Urine and prevent the Stone and Gout. But it must be drank moderately.
4. Greek, Latin, Thea, & Chaa. Spanish, Thé verde. Italian, French, Thé verd. German, Dutch, Thé.

Plate 352. Bohea or Peco Tea. Thea frutex, Bontii, Chaa.

1. This Shrub grows much of a height as the other, and is thought the same by many; and that the only Difference is in the Drying of the Leaves or the Time of gathering them; whereas by what Kempfer says, the Soyl and the Climate make a considerable Difference; his Words are Folium ratione foli natalis, situs, aetatis haud parum in substantia magnitudine et figura varias. f. 611.
2. It grows in Japan and flowers in Summer. This Specimen was taken from Kempfer, who took it on the Spot.
3. This Tea is esteem'd balsamic and analeptic; and good for Consumptions, but must be used moderately.
4. Greek, Latin, Thea. Spanish, Thé. Italian, French, Thé. German, Dutch, Thé.

1. This Shrub grows about a Yard high; the Leaves are a deep Green, and the Flowers yellow with a purple Bottom.
2. It is cultivated in Greece, Turky, Sicily and Malta; & flowers in June.
3. The Seed is accounted balsamic and restringent, good for Coughs, shortness of Breath, soreness of Lungs, and Fluxes of all sorts.
4. Greek, Ξύλον, βάμβαξ. Latin, Gossipium frutescens semine albo. Spanish, Algodon. Italian, Bambaggia. French, Coton. German, Baumwoll. Dutch, Kattoen.

Plate 358. The Dragon-Tree. Draco Arbor.

1. This Tree grows large in its Native Climates; the Leaves are a blueish Green, and the Flowers staminous. The Specimen mark'd 1. is taken from a Tree in the Physick Garden & that mark'd 2. 3. & 4. from Clusius.
2. It grows in the Madera and Canary Islands.
3. The Dragon's Blood of the Shops comes from this Tree, and is esteem'd restringent, drying and binding; good for Diarrhaeas Dysenteries, spitting of Blood and all kinds of Haemorrhagies. It also fastens loose Teeth, and stops the Bleeding of the Gums & helps the Scurvy in them.
4. Greek, Latin, Draco arbor Clusii. Spanish, Italian, French, German, Dutch,

---

Plate 359. Cyclamen leaved Asarum. Asarum Cyclaminis folio.

1. This Plant grows about six Inches high, the Leaves are a deep Green on the Face and light on the Back; and the Flowers purple.
2. It grows in the West Indies, and flowers in May.
3. The Roots are accounted cordial, alexipharmic and sudorific good in all malignant contagious Fevers; it also helps the Collic and strengthens the Stomach.
4. Greek Latin, Asarum virginiarum Cyclaminis folio. Spanish, Italian, French, German, Dutch,

---

Plate 360. The Scythian Lamb. Agnus Scythicus.

1. This is a Moss that grows upon the Roots of a Fern, of a light brown Colour.
2. It grows in Tartary and Scythia.
3. It is esteem'd good for all kinds of Fluxes and Haemorrhagies, and to stop the Bleeding of Green Wounds.
4. Greek, Latin, Borometz. Spanish, Italian, French, German, Dutch,

Plate 361. The Citron-Tree. Citria Malus.

1. This Tree does not grow very big in its Native Climates; The Leaves are light grass Green and the Flowers white.
2. It grows in the West Indies, and flowers in the Spring.
3. The Peel is esteem'd drying, warming, & alexipharmic, good to strengthen the Stomach, and help malignant & pestilential Distempers. The Juice is cooling and sudorific, good to resist Putrefaction, and useful in all kinds of Fevers. The Seed is said to partake of the same Vertues, in a lower Degree, and is also good to destroy Worms. Officinal Preparations are, Aqua Corticum Citri. Syrupus è Succo, & è Corticibus Citri.
4. Greek, Μηδικὰ μῆλα Latin, Malus Medica. Spanish, Cidras. Italian, Citrone. French, Citron. German, Citron Depffell. Dutch, Citroen.

Plate 362. The Lemon-Tree. Limonia Malus.

1. This Tree very much resembles the Orange Tree (see P. 349.) in its manner of Growth; the Leaves are a light grass Green, and the Flowers white.
2. It grows in Spain & Portugal & flowers for several Months in the Summer.
3. Lemons are cooling & grateful to the Stomach, and very useful in all sorts of Fevers; they are also good for the Stone & stoppage of Urine. The Juice mixt with Salt of Wormwood is accounted an excellent Medicine to stop Vomiting & strengthen ye Stomach. The Officinal Preparation is, The Syrup of the Juice.
4. Greek, Latin, Malus Limonia acida. Spanish, Limon. Italian, Limone. French, Limonier. German, Limonien. Dutch, Limoen.

Plate 363. The Oily-Palm Tree. Palma oleosa.

1. This Tree grows to a good Bigness in its Native Country; the Leaves are a grass Green, and the Fruit a Chesnut Colour.
2. It grows on the Coast of Guinea.
3. The Oil, which is express'd from the Fruit of this Tree, is accounted good for all kinds of Pains and Weakness of the Nerves, Cramps in the Limbs, and strains and Bruises.
4. Greek, Χαμαιῤῥιφές. Latin, Palma foliorum pediculis spinosis fructu pruniformi, luteo Oleosa. Spanish, Palma menor. Italian, Palma menore. French, Palmier. German, Dutch,

---

Plate 364. The Mandrake. Mandragora.

1. The Stalks on which the Flowers grow are about six Inches high, ye Leaves are large and of a deep Green Colour; and the Flowers white.
2. Its Native Countries are Spain, Italy & Turky. It flowers in February.
3. This Plant is used outwardly for all kinds of Inflammations, hot Tumours and scrophulous Swellings.- Some commend the Juice, dropt into the Eyes, as good to take away their Heat and Redness.- By Reason that this Plant is rarely to be met with here; they generaly supply its Place (as an Ingredient in the Unguentum Populeon) with Henbane or English Tobacco.
4. Greek, Μανδραγόρας. Latin, Mandragora fructu rotundo. Spanish, Mandracola. Italian, Mandragola. French, Mandragore. German, Ulraun. Dutch, Mandragers-kruid.

Plate 365. Mouse=Ear. Pilosella.

1. The Stalks grow about 4 or 5 Inches high, the Leaves are a dark Green above and whitish underneath, and the Flowers a pale Yellow, strip'd with Purple on the Back.
2. It grows on Heaths and Commons; flowring all the Summer.
3. Doctor Hulse made use of the Juice of Mouse Ear, as a Remedy against the Herpes miliaris, or Shingles. It is accounted drying & binding, & a good vulnerary Plant; and good in all Fluxes. A Decoction of it, used as a Gargarism, is commended for Ulcers in the Mouth.
4. Greek, Μυὸς ὦτα. Latin, Auricula Muris. Spanish, Vellosilla. Italian, Orrechiara. French, Pilosella. German, Mauſs=Ohrlein. Dutch, Muisen=Oir.

Plate 366. House=Leek. Sedum majus.

1. The Stalk grows about a Foot high, the Leaves are a light Green tinctur'd with Purple; and the Flowers reddish.
2. It grows on the Tops of Houses, and flowers in June.
3. Houseleek is esteem'd cooling and restringent; and by some is commended as good to quench Thirst in Fevers & cool the Heat and sharpneſs of Urine, mixed in Poſset Drink. Prevotius in his Medicina Pauperum commends an equal Quantity, viz. ℥iij. of the Juice of this and Persicaria maculata boiled away to a Third Part; & given in Drink as a certain Medicine to stop a Looseneſs and bloody Flux. Outwardly it is useful against Burns and Scalds, St Anthonys Fire and the Shingles.
4. Greek, Αἰζῶν μεγα. Latin, Sedum majus vulgare. Spanish, Hyerva puntera. Italian, Sempervivo maggiore. French, Joubarbe. German, Hauſs=lauck. Dutch, Huis=loak

Plate 367. The true Maiden=Hair. Adianthum vulgare.

1. The Stalks grow about a Foot high, the Leaves are a graſs Green, & ye Seed brown.
2. It grows in Cornwall; but what is used in the Shops is generally brought from the Southern Parts of France.
3. This is the Maiden=Hair that ought to be used in making the Syrup, and every where else, where the true is prescribed; but the English Maiden=Hair generally supplys its Place. The true Maiden=Hair is opening & Attenuating, good for all Distempers of the Lungs and Breast, as Coughs, shortneſs of Breath, Hoarsneſs and the like. It is also accounted good for the Stone, Gravel, and Strangury. The Officinal Preparation is, the Syrup.
4. Greek, Ἀδίαντον. Latin, Capillus veneris. Spanish, Culantrillo de Pozzo. Italian, Capel venere. French, Capil venere. German, Frauen=Haar. Dutch, Venus=Hair.

Plate 368. Purging Flax. Linum catharticum.

1. The Stalks grow about a Span high, the Leaves are a graſs Green and the Flowers white.
2. It grows upon Dry hilly Places; flowring in June and July.
3. This Plant is much used by the Common People, for Rheumatic Pains in the Limbs, as also for tertian & quartan Agues & the Dropsy. They boil a handfull of it in Wine or Ale & drink the Decoction, which purges them strongly.
4. Greek, Λίνον ἄγειον. Latin, Linum pratense flosculis exiguis. Spanish, Lino montaraz. Italian, Lino salvatico. French, Lin sauvage. German, Flachs=lein. Dutch, Linnekruid.

Plate 369. West India Anacardium. Anacardium Occidentale.

1. This Tree grows very large, the Leaves are a grass Green, and the Flowers purple. The Specimen of the Leaves and Flowers is taken from a Branch that Mr. Joseph Millar the Apothecary has; and the Fruit is taken from One that Mr. Rand has, preserv'd in Spirits.
2. It grows in Jamaica and other Parts of the West Indies.
3. In Jamaica the Kernels of the Nuts are much eat, being first roasted in the Embers, till all the Caustic Oil is consumed. The Caustic Oil is very good for Corns and Warts.
4. Greek, Ἀνακάρδιον. Latin, Cajous. Spanish, Anacardo. Italian, French, Anacarde. German, Elephanten-Zauss. Dutch, Anacarden.

Plate 370. English Maiden-Hair. Trichomanes.

1. The Stalks grow about a Span long, the Leaves are a grass Green, and the Seed brown.
2. It grows in Shady Lanes and on old Stone Buildings.
3. This is used instead of the true Capillus veneris, and is accounted good for Coughs, Consumptions, the Stone, Gravel, and stoppage of Urine.
4. Greek, Latin, Polytrichum. Spanish, Italian, Capel venere. French, Politrie. German, Stein-brech. Dutch, Brouwen-hair.

Plate 371. The true Amomum. Amomum verum.

1. This Specimen is taken from Mr. Joseph Millar's the Apothecary.
2. It grows in Bunches of roundish triangular Capsulae, containing black cornerd rough Seed.
3. This Amomum is warming and comforting, and is good for the Collic, and cold Disorders of the Stomach and Bowels. It also promotes Urine and the Catamenia.
4. Greek Ἄμωμος. Latin, Amomum Racemosum. Spanish, Amomo. Italian, Amomo. French, Amome. German, Dutch,

Plate 373. The Coco=Nut Tree. Cacao, & Cacavate.

1. This Tree grows to be pretty big in its native climates. the Leaves are a deep Green & the Flowers yellow. This Specimen is taken from Mr. Joseph Millar's Collection.
2. It grows in Jamaica and Martinico; but the Best grow in the Caraccos, in New Spain.
3. The Kernels of the Nuts is what we make the Chocolate of, which is now so much used for Food; being accounted nourishing, restorative, fatning & provocative.
4. Greek, Latin, Amigdalis similis Guatimelensis. Spanish, Cacao. Italian, Cacao. French, Cacao. German, Dutch, Cacouw.

Plate 374. Anise. Anisum.

1. It grows about two Foot high, the Leaves are a pale Green & ye Flowers white.
2. It grows in Germany and Spain, and flowers in July.
3. The Seed is one of the four greater hot Seeds; and is esteemed good to expell Wind out of the Stomach and Bowels, either taken at the Mouth or applyed as a Glyster. It is also used for cold affections of the Lungs, Difficulty of Breathing and Asthma. The Oil distill'd from the Seed is often used in Carminative and Anodine Linaments, particularly for the Pleurisy and other Pains in the Side. The Officinal Preparation is, the Chimical Oil distill'd from the Seed.
4. Greek, Ἄνισον. Latin, Anisum Herbariis. Spanish, Anis. Italian, Aniso. French, Anis. German, Anyss. Dutch, Anys.

Plate 375. Golden Maiden=Hair. Polytrichum aureum.

1. This Plant grows about four or five Inches high; the Leaves are a shining yellowish Brown, and the Flowers or Caps gold colour.
2. It grows on Heaths and old Ant Hills flowring in October.
3. This is one of the five Capillary Plants, and is said to be good for Coughs and all Affections of the Lungs and Diseases of the Kidneys.
4. Greek, Latin, Polytrichum aureum majus. Spanish, Politrico. Italian, Capel venere. French, Gurguet. German, Frauwen=Haar. Dutch, Venus=Hair.

Plate 376. Spotted Lungwort. Pulmonaria maculosa.

1. The Stalks grow near a Foot high, the Leaves are a deep Green, and spotted above; and a pale Green without Spots underneath; and the Flowers a dull red and a blue purple on the same Stalk.
2. It is planted in Gardens, and flowers in March and April.
3. The Leaves are accounted pectoral and balsamic; good for Coughs, Consumptions, spitting of Blood, and the like Disorders of the Lungs. They are also put into Wound=Drinks and traumatic Decoctions, being agglutinating, and good to heal Wounds, Ulcers, and old Sores.
4. Greek, Latin, Symphy maculosum, sive Pulmonaria latifolia. Spanish, Pulmonaria. Italian, Pulmonaria. French, Herbe aux Pulmons. German, Lungencraut. Dutch, Longekruyd.

Plate 385. The greater & lesser Cardamoms & Grains of Paradyce. Cardamomum majus, minus et maximum; vel Grana Paradisi.

1 The greater Cardamoms are long, somewhat triangular Pods; full of corner'd, reddish brown, hot aromatic Grains; but the Tree on which they grow is not known here. They grow in the Island of Java in the East Indies. The Lesser Cardamoms are small triangular Capsulae containing several corner'd brown Grains of an hot, spicy, aromatic Taste, and a pleasant Smell. They grow in the East Indies. The Grains of Paradyce, or the largest Cardamoms are of a reddish brown Colour, and a hot biting Taste; but not so aromatic as the other Cardamoms; these Grains grow in roundish Pods, in shape like an unripe Fig. They grow in Guinea; but the Tree is not known here. The Fruit and Seed of these Three Cardamoms I had from Mr. Joseph Millar, and the Specimen of the Tree of the Lesser Cardamoms is taken from the Malabar Garden Vol. II. Tab. 5.

3. The Seed of all these Three is said to be good to comfort and strengthen the Stomach and Bowels, help Digestion, the Jaundice and the Collic, ease Distempers of the Head and Nerves, provoke Urine and the Menses.

4. Greek, Καρδάμωμον. Latin, Cardamomum majus vulgare, Cardamomum minus vulgare, Melligette. Spanish, Cardamomo, Grana de Paradiso. Italian, Cardamomo, Cardamo. Plate 393. Sarsaparilla of America. Smilax aspera Peruvana.

1. This Plant has slender prickly Stalks, the Leaves are a deep Green above and light underneath, the Flowers white with green Stamina and white Apices. and the Roots a very dark Brown; This Specimen I had from the Malabar Garden Vol. 7. Tab. 31. and the Root from Mr. Nicholls.
2. It grows in Peru & Brasil, & flowers in August and September.
3. The Roots are heating, drying, attenuating & sudorific, & of great service in the Lues Venerea, for which it has been accounted a Specific; and much used in Diet Drinks for that Purpose. It is accounted a great sweetner of the Blood, and is serviceable for the Gout, Rheumatism, Scurvy, and King's Evil.
4. Greek, Σμίλαξ Latin, Smilax Peruvana Sarsaparilla. Spanish, Sarsa-parrilla de Peru. Italian, Zarsa-parille di Peru. French, Sarcepareille de Perou. German, Sarsa Parill. Dutch, Zalza Paril.

Plate 394. Bitter & Sweet Costus. Costus amarus & dulcis.

1. The Stalks grow about four Foot high, the Leaves are a bright shining Green, the Flowers white with a yellow Apice, & a red Calix. The Costus dulcis is said to be the freshest Roots of this Tree, & the Costus amarus to be the oldest and stalest. This Specimen I had from ye Malabar Garden Vol. 11. Tab. 15. & ye Roots from Mr. Nicholls.
2. It grows in Malabar in the East Indies, and flowers in May.
3. Costus is esteem'd hot and dry, good to comfort the Head & Stomach, and help Vertiginous Disorders. It is also a good Deobstruent, opening Obstructions of the Womb, and procuring the Catamenia. It is an Ingredient in the Theriaca; and the Electuarium Caryocostinum.
4. Greek, Latin, Costus Indicus odoratus. Spanish, Costo amarago y dulce. Italian, Costo amaro & dolce. French, Costus Arabique. German, Fraunven Craut. Dutch, Kost Balsem.

Plate 395. The Nux vomica of ye Shops. Nux vomica in Officinis.

1. This grows to be a large Tree in the East Indies, the Leaves are a bright Green above & a deep Green underneath, and the Flowers a pale Green. This Specimen I had from the Malabar Garden. Vol. 1. Tab. 37. & the Seed from Mr. Nicholls.
2. It grows in the East Indies, and flowers in July & August.
3. Commelein has given a great many Virtues to the different Parts of this Tree, see the Hortus Mal. as above; but our College of Physicians have thought ye Nuts narcotic & poisonous; & are generally used to kill Cats & Dogs.
4. Greek, Latin, Nuces Vomicae. Spanish, Neuz vomica. Italian, Noces vomica. French, Noix vomique. German, Dutch,

Plate 397 Turbith. Turpethum.

1 This Plant shoots forth many long climbing Branches, that twist about each other, like the great Bindweed; the Leaves are a grass Green, & the Flowers a whitish Green, with yellow Stamina, & the Seed is a dark Brown. This Specimen of the Plant I had from Herman's Leyden Garden f 179. and the Roots I did from the Life.

2 It grows in Ceylon and Malabar in the East Indies.

3. The Roots are brought to us from the East Indies, & are a pretty strong Cathartic, purging tough serous Humours from the remote Parts, which helps the Dropsy Gout & Rheumatism. The Roots are put into several of the stronger purging Compositions. The Pulvis Diaturpethi compositus takes its Name from this Root.

4. Greek Latin, Turpethum repens foliis Altheae vel Indicum. Spanish, Turbit. Italian, Turbito. French, Turbit. German, Dutch, Turbit.

Plate 398. The Sebesten Plumb. Sebesten & Myxa.

1. This Tree grows about the Bigness of our Plumb Trees; the Leaves are a deep shining Green above, & a dull hoary Green underneath and the Flowers white enclosed in a Green Calix, with white Stamina & yellow Apices, with a light Green umbel in the Middle. I had this Specimen from the Malabar Garden Vol. 4. Tab. 37. and the separate Fruit I had from Mr Joseph Cutton, Apothecary.

2 It grows in Malabar in the East Indies, and is always Green, bearing Fruit in July and August.

3 The Fruit is accounted cooling & moistning, good for sharp thin Defluxions upon the Lungs, Coughs, Catarrhs, and heat of Urine.

4. Greek, Latin, Sebestena Myxa, & Myxara. Spanish Italian, Sebestena. French, Sebesten. German, Brust Beerlein. Dutch, Borst-pruimen.

Plate 399. Zedoary. Zedoaria.

1 The Stalks that shoot from the Roots on which the Flowers grow are about five or six Inches long; & the Leaves a light grass Green, the Calix of the Flowers whitish, and the Flowers are stript red, white, yellow & Purple. The Stamina is purple & ye Apice yellow. This Plant I had from the Malabar Garden Vol. 11. Tab. 9. and the separate Roots I did from the Life.

2 It grows in Malabar in the East Indies and flowers in June.

3. The Roots are esteemd heating & drying, good to warm the Stomach, expell Wind, comfort the Bowels, stop Vomiting, and ease the Collic. They are also alexipharmic, and good in all Pestilential Distempers.

4. Greek, Latin, Zedoaria longa & rotunda. Spanish, Zedoaro. Italian, Zedoario. French, Zedoaire. German, Zitwer. Dutch, Zedoar.

Plate 400. The Emblick Myrobalan. Myrobalanus Emblica.

1. This Tree grows about 24 Foot high, the Leaves are a dark Green above & a light Green underneath, and the Flowers white, with white Stamina and yellow Apices; and the Fruit a pale Green; both without & within. This Specimen I had from the Malabar Garden Vol. 1. Tab. 38. & the Fruit that is open and divided I did from the Life.

2. It grows in several Parts of the East Indies.

3. This Species of the Myrobalans is said to purge Phlegm at first, & afterwards Choler; and are an Ingredient in the Decoctum Epithymi.

4. Greek, Latin, Emblica. Spanish, Mirabel. Italian, Mirabolan. French, Myrobolans. German, Dutch,

Plate 402. Zerumbet. Zerumbet

1. This Plant is not certainly known to be the Zerumbet of the Arabians; but that the Curious may have an Oppertunity of enquiring more particularly into it; I have given them one Specimen from the Malabar Garden, Vol. 11. Tab. 7 and one from Herman's Catalogue of the Leyden Garden; f. 637. It grows about 18 Inches high, the Roots are cream colour, the Stalk a whitish Green, the Leaves a deep Green above & light underneath, and the Flowers whitish.
2. It grows in Ceylon in the East Indies.
3. The Roots are commended in the Malabar Garden, as good to quench all inward Heat, purge the Reins, stop the Fluor Albus, and a Gonorrhea.
4. Greek, Latin, Zerumbet & Zenziber silvestris. Spanish, Zenzevero agreste. Italian, Zinzero salvatico. French, Gingembre sauvage. German, Dutch,

Plate 405. Female Satyrium. Satyrium foemina.

1. This is a lower Plant than the Male, (see Plate 53.) it grows about a Foot high, the Leaves are a light grass Green without any Spots, and the Flowers a light Purple.
2. It grows in moist Meadows and flowers in May.
3. This Plant is said to have the same Virtues as the Male, being esteemed a Stimulus to Venery, a strengthener of the genital Parts, and good to help Conception; and is a Chief Ingredient in the Electuarium Diasatyrium; which is the only Officinal Preparation.
4. Greek, Ὄρχις & Ἀρρενοειδὲς. Latin, Orchis morio foemina. Spanish, Cojon de Perro. Italian, Satirione. French, Satyrion. German, Schmal Knabencraut weible. Dutch, Standel kruid.

Plate 406. Scorzonera or Vipers-grass. Scorzonera & Viperaria.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It is a Native of Spain; and is planted here in Gardens, flowring in May.
3. The Root is esteemed cordial, sudorific, alexipharmic, and good in all kinds of Fevers; malignant Distempers, & the Bites or Stings of venemous Creatures.
4. Greek, Latin, Viperaria. Spanish, Scurzonera. Italian, Scorzonera. French, Scorzonere & Cercifi d'Espagne. German, Schlangen-mord. Dutch, Gift-wortel.

Plate 407. Mithridate-Mustard. Thlaspi vulgare.

1. The Stalks grow about two Foot high, the Leaves are a deep Green, and the Flowers white.
2. It grows in Corn Fields, and flowers in May.
3. The Seed of this Plant is used instead of that of the Treacle Mustard, (see Vol. 1. Plate 68) the Virtues being much the same, & is accounted hot, dry, and diuretick, good for the Dropsy, Gout, Sciatica, & forwarding the menstrual Evacuations.
4. Greek, Θλάσπι ἕτερον. & Σίναπι Ἄγριον. Latin, Thlaspi arvense Vaccariae incano folio majus. Spanish, Xenabe agreste. Italian, Taspi. French, Seneve Sauvage. German, Besencraut. Ducth, Wilde ofte, & Boere kers.

Plate 408. Alexanders. Smyrnium.

1. The Stalks grow about four Foot high, the Leaves are a grass Green, and the Flowers a whitish Green.
2. It grows upon the Rocks along the Sea side, & flowers in May & June.
3. This Herb is much eat as a Sallad; and is said to be of the Nature of Smallage or Parsley, but stronger; and therefore may be of Service to open Obstructions of the Liver and Spleen, provoke Urine and the Catamenia; and help the Dropsy and Jaundice
4. Greek, Σμύρνιον. Latin, Hipposelinum & Hipposelinum Theophrasto, seu Smyrnium Dioscoridi. Spanish, Apio Macedonico. Italian, Smirnio & Macerone. French, Maceron. German, Gross Appich. Dutch, Groot Peterselie.

Plate 409. Columbine. Aquilegia.

1. The Stalks grow about two Foot high; the Leaves are a bluish Green, and the Flowers a fine blue.
2. It grows wild in several Places of England & flowers in May or June.
3. The Leaves are accounted good for sore Mouths, and Inflammations of the Jaws and Throat; for which they are used in Gargarisms. The Seed is esteemd good to open Obstructions of the Liver and Spleen; & to prevent and cure the Jaundice. Clusius commends the Seed to be given in Wine, to accelerate the Birth, and to repeat it, if there be occasion. Some use the same Medicine to drive out the small Pox and Measles.
4. Greek, Latin, Aquilegia sylvestris. Spanish, Paxarilla agreste. Italian, Aquilola salvatica. French, Ancholie sauvage. German, Agelen. Dutch, Akeleyen.

Plate 410. Sweet Naven. Napus dulcis.

1. The Stalks grow about three Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It is sown in Gardens, and flowers in May.
3. The Ancients commend the Seed as good against all kinds of Poisons, and the Bites of Venemous Creatures; as also to provoke Urine & the Terms. Matthiolus extols it as good to expel the Malignity of all Infectious Distempers; to drive out the small Pox and Measles & Chear the Heart. It is an Ingredient in the Theriaca Andromachi.

---

Plate 423. Barley. Hordeum.

1. The Stalks grow about two or three Foot high, the Leaves are yellowish when ripe, and the Flowers a pale Green.
2. It is sown in the Spring and is ripe in July.
3. Barley is made into Bread in some Countries, & is much used by ye Brewer and the Distiller. It is accounted cooling mollifying & cleansing; a Decoction of it is of great Service in all kinds of Fevers & inflammatory Distempers, the Stone, Gravel, Heat and sharpness of Urine. Barley Broth is esteemed the best Nourishment in Acute Diseases. The Ptisana, so much commended by antient Physicians, was made of husk'd Barley, boiled so long in Water till the Barley crack'd, and the Liquor became thick like Cream.
4. Greek, Κριθή. Latin, Hordeum distichum. Spanish, Cevada. Italian, Orzo. French, Orge. German, Gersten. Dutch, Gerst.

Plate 424. Rye. Secale.

1. The Stalks grow about four or five Foot high, the Leaves are a pale yellow when Ripe, and the Flowers a pale Green.
2. It is sown in October and is ripe in July.
3. Rye is more used for Bread than Medicine; and is apt to gripe those that are not used to it. The Farina is sometimes prescribed outwardly in Cataplasms against Tumors and Inflammations.

Plate 425. The Black Cherry. Cerasus nigra.

1. This grows to be a pretty tall Tree; the Leaves are a deep grass Green, and the Blossoms white.
2. This Tree grows wild in several Parts of England, and flowers in April.
3. The Fruit is accounted cordial and cephalic and useful in all Diseases of the Head and Nerves, as Epilepsy, Convulsions & Palseys. Some commend it for the Stone, Gravel & stoppage of Urine. The Officinal Preparation is, the Distill'd Water; which is more used now than any other Simple Water.
4. Greek, Κεράσια. Latin, Cerasus major ac sylvestris fructu subduloi nigro colore inficiente. Spanish, Guindo. Italian, Ciregе. French, Cerisier. German, Fin Gersch-Baum. Dutch, Kerse-boom.

Plate 426. Siler Mountain. Seseli.

1. The Stalks grow about four or five Foot high, the Leaves are a light grass Green, and the Flowers white.
2. It is a Native of the Alps, and flowers in June.
3. The Herb and Seed are used, being esteem'd heating and drying, good to provoke Urine and the Menses, expell the Birth & After-Birth and help Disorders of the Head and Womb. The Seeds are put into the Theriaca and Mithridate.
4. Greek, Σέσελι. Latin, Siler Montanum. Spanish, Sesamo. Italian, Seseli. French, Sesame. German, Steinbrech. Dutch, Esels Commyn.

Plate 427. Eye-bright. Euphragia.

1. The Stalk grows about eight Inches high, the Leaves are a deep Green and the Flowers white, with a yellow Spot in the Middle, and several black Stripes running lengthways.
2. It grows in Fields and Commons flowring in July.
3. This Plant is famous for all Disorders of the Eyes, especially for Dimness of Sight; and to strengthen it, when weak or decayed, either given in the Juice, or Decoction, or the Powder of the Leaves. A Powder made of two Ounces of Eyebright, and half an Ounce of Mace is very much commended for the above Ends; especially after proper Evacuations. Some esteem it good for the Jaundice. The Officinal Preparation is, the Agua Euphrasiae.
4. Greek, Εὐφροσύνη. Latin, Euphrasia, & Euphrasia officinarum. Spanish, Eufrasia. Italian, Eufragia. French, Eufraise. German, Augencrost. Dutch, Oogen-croost.

Plate 428. The lesser House-leek. Sedum minus.

1. The Stalks grow about six Inches high, the Leaves are a bluish Green, and the Flowers white.
2. It grows on old stone Walls & Buildings, flowring for several Months in ye Summer.
3. The Leaves & Stalks are accounted cooling, & good for all Kinds of Inflammation. This is the Sedum that ought to be put into the Unguentum Populeon.
4. Greek, Ἀσίζων μικρόν. Latin, Virmicularis. Spanish, Semperviva menor. Italian, Sempervivo minore. French, Joubarbe petite. German, Glein Hauss-wurk. Dutch, Kleine donderbaart.

Plate 429. The Vetch. Vicia.

1. The Stalk grows about three Foot long. the Leaves are a bluish Green, and the Blossomes Purple.
2. It is sown in Fields, and flowers in May.
3. Tares are seldome used now in the Shops, althô the Vulgar boil them in Milk, and give the Decoction to drive out the small Pox and Measles. Matthiolus says they are good to provoke Urine & help a Consumption, if they are boiled, and eat, in Barley Broth.
4. Greek, Βίκιον. Latin, Vicia sativa vulgaris, semine nigro. Spanish, Algarroba. Italian, Veccia. French, Vesse. German, Wicten, Dutch, Wikken.

Plate 430. Toothwort. Dentaria.

1. The Stalks grow about six Inches high, and the Flowers are Purple.
2. It grows in Mossy Ground at the Roots of Trees.
3. This Toothwort is accounted by Matthiolus, binding, cooling and cleansing, and good to promote Sleep. The Water distill'd from the Roots, he extolls as good for all sorts of Fluxes and the Epilepsy. Gerard says ye Country People used this Plant for Coughs, and all Disorders of the Lungs.
4. Greek, Ἀφύλλον. Latin, Dentillaria. Spanish, Italian, French, Dentaire. German, Onblat Schupenwurk. Dutch,

---

Plate 431. Mugwort. Artemisia

1. The Stalks grow about three Foot high; the Leaves are a deep Green above and hoary underneath, and the Flowers a purplish Yellow.
2. It grows in Hedges and waste Places, flowring in June.
3. The Leaves are chiefly used, especially against Distempers incident to the Female Sex, being of great service in promoting the menstrual Evacuations, either taken inwardly, or used outwardly in Baths & Semicupia. Some Recommend this Plant as good to strengthen the Head & Nerves, & help hysteric Fits or Vapours. The Moxa, so famous in the Eastern Countries for curing the Gout by Burning, is the Down of a lesser Species of Mugwort, viz the Artemisia Chinensis cujus Mollugo Moxa dicitur. See Pluknet Phytograph. Tab. 15. Fig. 1. The Officinal Preparation is the Syrupus Artemisiæ.
4. Greek, Ἀρτεμισία. Latin, Artemisia vulgaris major. Spanish, Artemisia. Italian, Artemisia. French, Armase. German, Benfuss. Dutch, Byvoot.

Plate 432. Rosa-solis. Ros Solis.

1. The Stalks grow about four Inches high, the Leaves are a grass Green covered with red Hairs, and the Flowers white.
2. It grows in Boggy Grounds, and flowers in June and July.
3. It is accounted by some a great Cordial, good for Consumptions, Convulsions and the Plague. Formerly a Cordial Water, in which this Herb was a chief Ingredient, was in great Repute under the Name of Rosa Solis; but now it is almost out of Date.
4. Greek, Latin, Ros Solis folio rotundo. Spanish, Rosolis. Italian, Rosa Solis. French, Rosée du Soleil. German, Sonner-thau. Dutch, Zonne-dauw.

Plate 433. West India China. China occidentalis.

1. This Plant whose Root is the China, is a Species of prickly Bindweed; the Stalks grow about fifteen Foot high, when they have Trees to climb up. The Leaves are a deep grass Green and the Flowers a greenish Yellow.
2. It grows in Jamaica and other Parts of the West Indies.
3. China Roots are esteem'd sudorific and hepatic, good for the Gout, Dropsy, Kings Evil and the Lues Venerea. Some Physicians prefer this to the Oriental China, especially in Scrophulous Cases and Consumptions, where there are any Suspicion that they arise from a Scrophulous Cause.
4. Greek, Σμίλαξ τραχεῖα. Latin, Smilax aspera, fructu nigro, radice nodosa magna, laevi, farinacea, China dicta. Spanish, Volubiles aspero de las Indias occidentales. Italian, Smilace aspro di Indie occidentale. French, Volubilis aspre de l'Indie occidentale. German, Scharpffe Binden. Dutch, China-Wortel.

Plate 434. Hercules's Allheal. Panax Herculeum.

1. The Stalks grow about six or eight Foot high, the Leaves are a yellowish Green and the Flowers yellow.
2. It is a Native of Syria, and flowers in June.
3. The Gum opponax is said to come from the wounded Root of this Plant; and is accounted heating & dissolving, good to evacuate tough Phlegm from the remote Parts of the Body, & on that account is useful against old Coughs and Asthmas; it helps the Gout, Sciatica, & Rheumatic Pains in the Limbs, and procures the Catamenia. Outwardly applyed it is good to dissolve hard Swellings, Tumors, pestilential Buboes, & Cure the Bitings of Venemous Creatures.
4. Greek Πάνακες ἡρακλεῖον. Latin, Panax Pastinacae folio. Spanish, Panacea de Hercules. Italian, Panace Heraclio. French, Panacee de Hercule. German, Dutch,

Plate 435. Ladies Bedstraw. Gallium.

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers a bright Yellow.
2. It grows on Banks and dry Barren Places, flowring in June & July.
3. Yellow Bedstraw is accounted drying and incrassating, good to stop all kinds of Fluxes & Haemorrhagies, and cure green Wounds. Some commend a Decoction of it for the Gout, and a Bath of it is very refreshing to wash the Feet after overwalking.
4. Greek, Γάλιον. Latin, Gallium luteum. Spanish, Coaja leche Yerva. Italian, Galio. French, Petit Muguet. German, Meger Kraut. Dutch, Dal-stroo

---

Plate 436. Gromill. Lithospermum.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, and the Flowers white.
2. It grows in dry Fields and Hedges, flowring in May.
3. The Seed is esteem'd a great diuretic, & a Cleanser of the Reins and Ureters, and good against the Stone, Gravel, Stoppage & Heat of Urine, as also a Gonorrhea. It is generally boil'd in Wine or Water. Matthiolus commends two Drams of the Powder to be given in Womens Milk, as a speedy help in hard Labour.
4. Greek, Λιθόσπερμον μικρόν. Latin, Lithospermum majus erectum. Spanish, Myo del Sol. Italian, Miglio salvatico. French, Gremil. German, Stein-samen. Dutch, Paarel-Zaad.

Plate 441. Coloquintida. Colocynthis.

1. This Plant grows much like the Water Melon, its Leaves are a light grass Green, and the Flowers a pale Yellow.
2. It grows in Turkey, and flowers in June.
3. Coloquintida is one of the strongest purging Simples, used in the Shops; it carrys off serous Humors & tough Phlegm from all Parts of the Body, with pretty much Violence, and is generally attended with griping, Nausea and some times Vomiting. But when given with proper Correctives, it is serviceable in all Pains of the Head & Nerves, helps the Rheumatism, Gout & Dropsy; and promotes the Menses. The Officinal Preparation is, The Trochisci Alhandal.
4. Greek, Κολοκυνθὶς. Latin, Colocynthis fructu rotundo, minor. Spanish, Coloquintida. Italian, Coloquintida. French, Coloquinte. German, Coloquinth. Dutch, Koloquint.

Plate 442. The German Amomum. Amomum vulgare.

1. The Stalks grow about two Foot high, the Leaves are a bright grass Green, and the Flowers white.
2. It grows in Ditches and Banks, flowring in June & July.
3. The Seed is one of the four lesser Hot Seeds used in the Shops; and is accounted drying & attenuating, good to open Obstructions, cleanse & Reins of Gravel, & promote the Menstrua. It is also esteem'd alexipharmic, for which it is put into & Theriaca Andromachi, for a Succedaneum to the true Amomum.
4. Greek, Σίσων. Latin, Sison, quod Amomum Officinis nostrum. Spanish, Apio. Italian, Petroselino Macedonico. French, Persil de Macedoine. German, Welscher Petersilien. Dutch, Piterselie van Macedonien.

Plate 443. Smallage. Apium.

1. The Stalks grow to be two or three Foot high, the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows in Marshy Places, flowring in June & July.
3. The Root is one of the five opening Roots, used in the Shops; and is accounted diuretic, and good for the stoppage of Urine, the Stone, the Gravel, Obstructions of the Liver & Spleen, the Dropsy, the Jaundice, & Obstructions of the Menses. The Leaves have much the same Qualities, and are eaten in the Spring to sweeten and purify the Blood, & help the Scurvy. The Seed is one of the four lesser hot Seeds used in the Shops; & is esteem'd carminative.
4. Greek, Ἐλεοσέλινον. Latin, Eleoselinum. Spanish, Perecil dagea. Italian, Apio aquatico. French, Persil de Leau. German, Eppich, Dutch, Juffroun, Merk.

Plate 444. The lesser Burdock. Xanthium.

1. The Stalk grows about a Foot high, the Leaves are a dull yellow Green, and the Flowers a dull brownish Green.
2. It grows in rich fat Soils, and flowers in June & July.
3. Some commend this Plant for Scrophulous Tumors, the Juice being taken inwardly, and the Leaves applyed to the Swellings. Matthiolus extols it much, as good for the Leprosy.
4. Greek, Ξάνθιον. Latin, Bardana minor. Spanish, Lappa menor. Italian, Lappa minore. French, Grapellas. German, Bettlergleuss. Dutch, Kleine Klitten.

Plate 445. Tormentill. Tormentilla.

1. The Stalks grow about six Inches high; the Leaves are a bright grass Green, and the Flowers yellow.
2. It grows on Commons and in Woods; flowring in July.
3. The Roots are esteem'd drying, binding and alexipharmic, & good for Diarrhaeas and Dissenteries, especially attended with malignant Fevers. They are also serviceable in Haemorrhagies of the Nose, Mouth or Womb; fasten loose Teeth, and help the falling of the Uvula.
4. Greek, Ἑπτάφυλλον. Latin, Heptaphyllum. & Tormentilla sylvestris. Spanish, Siete en Rama. Italian, Tormentilla. French, Tormentille. German, Tormentill. Dutch, Tormentille.

Plate 446. Mustard. Sinapi.

1. The Stalk grows about three Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in Waste Places and amongst Rubbish, and is cultivated also in Gardens, flowring in June.
3. The Seed of this Plant is what makes the Common Sauce call'd Mustard, which is a wholesome Condiment, provoking an Apetite, strengthening the Stomach, and helping Digestion; it is also good for the Head, Apoplexy, Lethargy & Palsy, especially of the Tongue. The Seed bruised & infused in Wine or Ale is of great service for the Scurvy and Dropsy, provoking Urine and the Menses. Outwardly applyed it is drawing and ripening; & laid on paralitic Members it recalls the Natural Heat.
4. Greek, Σίνηπι. Latin, Sinapi Rapi folio. Spanish, Xenabe ô Xenable. Italian, Senapa. French, Seneve. German, Senff. Dutch, Mostert.

Plate 447. Bishop's Weed. Ammi vulgare.

1. This Plant grows about three Foot high, the Leaves are a bright grass Green, and the Flowers white
2. It is rarely found wild in England; altho' Parkinson says it grew wild at Greenhith in Kent; it flowers in June.
3. The Seed is one of the four lesser hot Seeds, used in the Shops; and is accounted drying & warming, good to expell Wind from the Stomach & Guts, and prevent the Collick. It is also diuretic, and helps to provoke Urine and the Courses.
4. Greek, Ἄμμι. Latin, Ammi majus. Spanish, Ammi. Italian, Ammi. French, Ammi. German, Amei. Dutch, Ammi.

Plate 448. Dittander or Pepperwort. Lepidium & Peperitis.

1. The Stalks grow about two Foot high, the Leaves are a bluish Green, and the Flowers white.
2. It grows in moist Places near Rivers, flowring in June and July.
3. The Leaves bruised and mix'd with Hog's Lard, and applyed as a Cataplasm to the Hip, are accounted good for the Sciatica; when chew'd, they cause a great Flux of Rheum to run out of the Mouth, which they esteem good for Scrophulous Tumours in the Throat. The Women in Suffolk give them boil'd in Ale to hasten the Birth.
4. Greek, Κοχλιδιον. Latin, Lepidium latifolium. Spanish, Pimiento ô Nasturcio. Italian, Piperite. French, Passerage ou Poivre. German, Pfeffer Kraut. Dutch, Peper kruid.

Plate 449. Red=Cherry. Cerasus rubra.

1. This Tree never grows so big as the Black Cherry (see Plate 425) the Leaves are a grass Green, and the Blossomes white.
2. It is planted in Gardens, flowring in April.
3. The Fruit is esteem'd more cooling than the Black, and is gratefull to the Stomach, quenching Thirst and wheting the Apetite. The Gum is accounted Lithontriptic, and good for the Stone and Gravel.
4. Greek, Κεράσια. Latin, Cerasa sativa rotunda, rubra & acida. Spanish, Guindo. Italian, Ciregio e Ceraso. French, Cerisier. German, Fin Kersch=baum. Dutch, Kerse boom.

Plate 450. Hares=foot. Lagopus.

1. The Stalks grow about a Foot high, the Leaves are a light grass Green, and the Flowers a pale Purple.
2. It grows among Corn and in fallow Fields; flowring in July.
3. Hares foot is accounted drying and binding, good for a Diarrhea and Dysentery, and to stop the too great Flux of the Catamenia and Fluor Albus. It helps the Ulceration in the Bladder & allays the Heat & Pain in making Water.
4. Greek, Λαγώπους. Latin, Pes Leporinus. Spanish, Pie de Liebre. Italian, Lagobo, e Trifoglio. French, Pied de Lièvre. German, Hasen=fuss. Dutch, Gen Hazemont.

Plate 451. Hemlock. Cicuta.

1. The Stalks grow about six Foot high, the Leaves are a yellow grass Green, and the Flowers white.
2. It grows in Hedges & Ditches, flowring for several Months in the Summer.
3. This Hemlock answers the Description of Dioscorides's, which was of such a Poisonous Nature that the Athenians used to put their Criminals to Death by it; but it would seem to have lost its malignant Qualities in this Region, because several Persons have eat some Quantity of the Root and Stalk, without any bad Consequence. It is used outwardly in Swellings, and Hardness of ye Liver and Spleen; for which the Emplastrum de Cicuta cum Ammoniaco, is very useful, and is the only Officinal Preparation we have from it.
4. Greek, Κώνειον. Latin, Cicuta major. Spanish, Ceguta. Italian, Cigue. French, Cigne ou Cigue. German, Schirlinct. Dutch, Scheerling.

Plate 452. Lesser Centory. Centaurium minus.

1. This Centory seldome grows above a Foot high, the Leaves are a deep grass Green, and the Flowers a red Purple.
2. It grows in Fields & dry Pasture Grounds, flowring in June and July.
3. It is esteem'd cleansing and apperative, good to open Obstructions of the Liver and Spleen, provoke Urine and the Menses, help the Jaundice and intermitting Fevers, strengthen the Stomach and destroy Worms. Outwardly it is used in Fomentations against Swellings and Inflammations. The Officinal Preparation is an Extract.

Plate 457. Black Briony. Bryonia nigra.

1. The Stalks grow to a great length climbing upon any Thing they grow near to; like those of the white Briony (See Plate 37) except the Tendrils, for this has none, the Leaves are a deep grass Green, and the Flowers a pale Green.
2. It grows in Hedges and Lanes, flowring in May and June.
3. Some Authors ascribe a purging Quality to the Roots; but Hoffman and Doctor Lister, could not find any such Quality in them, altho they tryed them several times. It is said to provoke Urine, and cleanse the Reins from Gravel; and a Cataplasm of the Root with Vinegar and Cow Dung is esteemed good for the Gout.
4. Greek, Ἄμπελος μέλαινα. Latin. Bryonia laevis sive nigra racemosa. Spanish, Brionia negra. Italian, Brionia nera. French, Brioine noir. German, Stict=Burk Dutch, Wilde Wyngaart.

Plate 458. Artichoke. Cinara, vel Scolymus.

1. The Stalks grow about three Foot high, the Leaves are a light Green & ye Flowers blue.
2. It is planted here in Gardens and flowers in June and July.
3. Artichokes are esteem'd a pleasant wholesome, and very nourishing Food. The Roots are accounted apperative, cleansing and diuretic good to help the Jaundice and provoke Urine.
4. Greek, Σκόλιμος. Latin, Cinara hortensis foliis aculeatis et non aculeatis. Spanish, Alcachosa. Italian, Articiocco. French, Artichaut. German, Strobildorn. Dutch, Artichocken.

Plate 459. Deadly=carrot. Thapsia.

1. The Stalk grows about two Foot high, the Leaves are a deep grass Green, and the Flowers yellow.
2. It is a Native of Italy and Spain, flowring in July.
3. The Root is accounted of a poisonous Nature working upwards and downwards with great Violence; and was formerly sold in the Shops for the Radix Turpethi.
4. Greek, Θαψία. Latin, Thapsia Carotae folio. Spanish, Turbino bastardo. Italian, Turbito fento. French, Turbit bastard. German, Bilde Turbit. Dutch, Wilde Turbit.

Plate 460. Buck's=horn=Plantain. Coronopus.

1. The Stalks grow about six Inches long; (for this Plant is overgrown being gathered out of the Garden) the Leaves are a light grass Green, and the Flowers a pale Green.
2. It grows in Sandy Ground and on Heaths flowring in June.
3. This Plantain is much of the Nature of the others, (see Plate 14 & Plate 35) being moderatly drying and binding, and a good Wound Herb; either taken inwardly or applyed outwardly; besides which it is particularly commended against the Bitings of all kinds of Venemous Creatures; and more especially for the Bite of a mad Dog.
4. Greek, Κορονόπους. Latin, Coronopus sylvestris hirsutior. Spanish, Gujabelha. Italian, Herba stella. French, Corn de Cerf, ou Sanguinaire. German, Grayen=fuss. Dutch, Herts-hoorn.

Plate 461. Pistachio. Pistachia.

1. This grows to be a large Tree in its Native soil; the Leaves are a light Green and the Flowers white.
2. It grows in the Eastern Parts of Persia and Turky.
3. The Fruit is esteemed nourishing and restorative, and good for weak Consumptive People, opening Obstructions of the Liver and Spleen. Matthiolus says they are a Provocative to Venery.
4. Greek, Πισάκια. Latin, Pistacia peregrina, fructu racemoso; sive Terebinthus Indica Theophrasto. Spanish, Pistacho. Italian, Pistacchia French, Pistachier. German, Pimper=nuss-baum. Dutch, Pistassi-boom.

Plate 462. Dittany of Creet. Dictamnus Creticus.

1. The Stalks grow about a Foot high, the Leaves are a pale Green covered with Wool, except those on the young Stalks next the Top, which have no Wool, & the Flowers are a light Purple.
2. It grows chiefly in the Island of Creet or Candy, & flowers in June.
3. This Plant was had in great Esteem among the Ancients, particularly Virgil, for its reputed Virtue of expelling the Arrows from wounded Bodies. It is still accounted alexipharmic, resisting Poison and all contagious pestilential Diseases; and is esteem'd good for the Bites or Stings of Venemous Creatures. It is of great Use to accelerate the Birth, expelling the Secundines and procuring the Catamenia. There is a good Quantity of it put into the Venice-Treacle, Mithridate and Diascordium. The Leaves are the only Part used.
4. Greek, Δικταμνον. Latin, Dictamnus Creticus. Spanish, Dictamo. Italian, Dittamo di Candia. French, Dictame. German, Bilder=Poley. Dutch, Dictamnus van Candie.

Plate 463. Bill=berry. Vaccinia.

1. This Bush grows about a Foot high, the Leaves are a bright grass Green, and the Flowers a red Purple.
2. It grows on Heaths and in thin woody Places, in a boggy Soil, and generally among Ferns, flowring in May.
3. The Fruit is cooling, binding and grateful to the Stomach and good for Fluxes and Haemorrhagies. Symon Paul says they are much used against the Scurvy in Norway and other Northern Countries. An agreeable Syrup may be made of ye Juice, and used for all the above Intentions.
4. Greek, Χαμαιμυρσίνη. Latin, Myrtillus, & Vitis Idaea, foliis oblongis crenatis, fructu nigricante. Spanish, Mirtho agreste. Italian, Mirtillo. French, Airelle, ou Mirtille. German, Heidelbeer. Dutch, Myrtill.

Plate 464. Tansie. Tanacetum.

1. The Stalks grow about two Foot high, the Leaves are a grass Green, & the Flowers yellow.
2. It grows wild by Road-Sides, and the Borders of Fields, flowring in July.
3. The Leaves are accounted warming and apperative, good for Obstructions of the Liver and Spleen, and of great Use in the Jaundice. They also provoke Urine & the Catamenia; yet the ignorant Midwifes often give a Syrup of the Juice to prevent Miscarriage. The Flowers are esteem'd good to destroy Worms in Children.
4. Greek, Latin, Tanacetum. Spanish, Italian, Tanaceto. French, Tanaisi. German, Rein-farn. Dutch, Worm-kruid.

Plate 465. Meadow-Sweet. Ulmaria.

1. The Stalks grow about three Foot high; the Leaves are a bright Green above, and hoary underneath, and the Flowers a cream Colour.
2. It grows in moist Meadows, and by River-sides, flowring in June.
3. The Leaves & Tops are accounted alexipharmic & sudorific, and good in Fevers and all malignant Distempers; they are also restringent and binding, and usefull in all kinds of Fluxes. They are an Ingredient in the Aqua lactis. The Officinal Preparation is ye Aqua Ulmariae.
4. Greek, Latin, Barba Caprae floribus compactis, & Regina Prati. Spanish, Regna de los Prados. Italian, Regina di Prato. French, Reine des Pres. German, Veis-hart. Dutch, Reinette.

Plate 466. The True Acorus. Acorus verus.

1. The Stalks grow about two Foot high, the Leaves are a light grass Green, and the Juli a light greenish Brown.
2. It grows in Rivulets, particularly in Surry, Cheshire and Norwich, and shoots forth its Catkins in July and August.
3. The Roots are esteem'd hot, dry, opening and attenuating, and good for Obstructions of ye Liver and Spleen; they provoke Urine and the Menses, help the Colick, resist Putrefaction, are useful against pestilential Contagions, and corrupt noxious Air; and are outwardly used in Sweet Bags & Perfumes. They are an Ingredient in ye Theriaca & Mithridate.
4. Greek, Ἄκορον. Latin, Calamus aromaticus. Spanish, Acoro. Italian, Acoro. French, Acorus. German, Kalmus. Dutch, Calmoes.

Plate 467. Dropwort. Filipendula.

1. The Stalks grow about a Foot high, the Leaves are a deep grass Green, and the Flowers white within and red on the outside.
2. It grows in Chalky Grounds, and flowers in June and July.
3. The Leaves and the Roots, but especially the last are accounted diuretic, and good for the Stone, Gravel, and stoppage of Urine. The Powder is commended by Mr. Ray, from Doctor Needham and Simon Paul, to stop violent Floodings and the Whites; thô Parkinson says it was used in his time to expell the Secundines. Prevotius commends it against the Bloody Flux; from his own Experience.
4. Greek, Latin, Filipendula vulgaris. Spanish, Filipendula. Italian, Filipendula. French, Filipendule. German, Rother stein-brech. Dutch, Roode steen-breke.

Plate 468. Distaff-Thistle. Atractylis.

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, & ye Flowers yellow.
2. It grows in Italy & Greece, where ye Women use the Stalks for Distaffs; & flowers in June.
3. Doctor Boerhave thought that this Plant had the same Virtues with the Carduus benedictus (see Plate 476) and esteem'd it good to Purge, Vomit, provoke Urine, or Sweat; according to the Quantity that was taken. Those who have a mind to know what he says at large upon it, may consult his Historia Plant. quae in Hort. Acad. Lug. Bat. crescunt Pag. 200.

Plate 473. Elecampane. Helenium.

1. The Stalks grow about four or five Foot high; the Leaves are a grass Green, and the Flowers yellow.
2. It grows in moist Fields and Meadows, in several Parts here; but is often planted in Gardens, and flowers in July.
3. The Roots are esteem'd pneumonic, carminative, sudorific and alexipharmic, of great service in Shortness of Breath, Coughs, stuffing of the Lungs, and in infectious and contagious Distempers. They are also good for the Gout & Sciatica, the Stone and stoppage of Urine, and provoke the menstrual Fluxes, for which they are frequently mixed with Chalibeats. Outwardly they are used for the Itch, either the Juice or Powder mixed with a proper Ointment. Officinal Preparations are the Unguentum Enulatum cum et sine Mercurio.
4. Greek, Ἐλένιον. Latin, Enula Campana. Spanish, Ala. Italian, Enola. French, Herbe d' Elaune. German, Alankwurk. Dutch, Alant-wortel.

Plate 474. Bog-bean. Trifolium palustre.

1. The Stalks grow about two Foot high that bear the Flowers, the Leaves are a yellow Green, and the Flowers a whitish Purple.
2. It grows in marshy boggy Grounds, and flowers in May.
3. This Plant is esteemed a great antiscorbutic, and very serviceable for the Gout, Rheumatism and Dropsy; for which Distempers it is much used in Diet-Drinks. It is also a good stomatick, and is taken often in Intermitting Fevers.
4. Greek Μηνυανθὲς. Latin, Trifolium paludosum, et Menyanthes. Spanish, Trebol ô Mielga Lagunosa. Italian, Trifoglio paludoso. French, Trifolio ou Trefel des mairais. German, Spicktlee. Dutch, Seven Betydenkruyd.

Plate 475. Scordium or Water-Germander. Scordium.

1. The Stalks grow about a Foot high, the Leaves are a deep grass Green, and the Flowers a light Purple.
2. It grows in marshy Places, especially in the Isle of Ely, and flowers in July.
3. The Leaves are accounted sudorific & alexipharmic, and a good Preservative & Remedy against all malignant and pestilential Diseases & putrid Fevers. They also resist Putrefaction, destroy Worms & are good against the Bites of all Venemous Creatures: They are used in Venice Treacle & Mithridate; and Diascordium takes its Name from this Plant.
4. Greek, Σκόρδιον. Latin, Scordium. Spanish, Scordio. Italian, Scordio. French, Scardium, ou Chammaraz. German, Wasser-batzhnig. Dutch, Water-look.

Plate 476. Carduus, or the Blessed Thistle. Carduus benedictus.

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers yellow.
2. It is sown every Year in Gardens, flowring in June.
3. This Plant takes its Name from the wholsome Qualities said to be in it, being accounted cordial & sudorific, and good for all sorts of malignant and pestilential Fevers, and for Agues of all kinds. It destroys Worms in the Stomach and is good against all sorts of Poison. The Decoction of it in Water or Possit-Drink is much used as a Vomit. It is an Ingredient in the Treacle Water. The Officinal Preparation is, the Aqua Cardui.
4. Greek, Κνίκος. Latin, Cnicus sylvestris hirsutior; sive Carduus benedictus. Spanish, Cardo bendito. Italian, Cardo benedetto. French, Chardon benit. German, Cardo-benedict. Dutch, Besegende Distel.

Plate 477. The Larch-Tree. Larix.

1. This grows to be a tall Tree in its Native Soil; the Leaves are a bright grass Green, and the Catkins red.
2. It grows in the Stirian Alps, and the Mountains of Tirol and Carinthia; and sends forth its Catkins in March and April.
3. From the Trunk of this Tree the Venice Turpentine came which was formerly much used in the Shops, being of a brownner Colour, and thicker than ye Strasburg, and of a more resinous Smell; but what goes under that Name now, is generally brought from New-england. Turpentine is heating, mollifying, and cleansing, good to stop a Gonorrhaea and the Fluor Albus. It Likewise provokes Urine, cleanses the Lungs, and is of great service outwardly in Ointments and Plaisters. Officinal Preparations are the Oleum and Balsamum Terebinthi.
4. Greek, Λάριξ. Latin, Larix. Spanish, Tea. Italian, Larice. French, Meleze. German, Lerchenbaum. Dutch, Lorkenboom.

Plate 478. The Turpentine-Tree. Terebinthus.

1. This grows to be a large Tree in the Eastern Countries; the Leaves are a bright grass Green, and the Flowers purple.
2. It grows in the Island of Chio, from whence we have the best Turpentine, and flowers in April.
3. The Liquid Rosin of this Tree was prefer'd by the Ancients to all other Kinds, now call'd Turpentines, for Affections of the Breast & Lungs, and for Diseases of ye Kidneys or Bladder, as Stone, Gravel and stoppage of Urine. It is frequently used for the Fluor Albus and Gonorrhaea.
4. Greek, Τέρμινθος. Latin, Terebinthus vulgaris. Spanish, Cornicabra. Italian, Terebinto. French, Terebinte. German, Terpentzinbaum. Dutch, Terpent

---

Plate 479. White Horehound. Marrubium album.

1. The Stalks grow about a Foot high, the Leaves are a light Green, and the Flowers white.
2. It grows by Road-sides and in Lanes, and flowers in June.
3. The Leaves and Tops are accounted hot, dry, and pectoral, and good to free the Lungs from tough viscid Phlegm, especially in cold moist Constitutions, the Juice being made into a Syrup with Sugar or Honey. They also open Obstructions of the Liver & Spleen, and are very serviceable against the Dropsy, Jaundice, Green Sickness, Obstructions of the Catamenia, suppression of the Lochia, & other Distempers of the female Sex; for which few Herbs go beyond it. The Officinal Preparation is the Syrupus de Prassio.
4. Greek, Πράσιον. Latin, Prassium. Spanish, Marrubio. Italian, Marrobio. French, Marrubium, ou Marrube blanc. German, Weisser Andorn. Dutch, Andorn Malrow.

Plate 480. Herb Robert. Geranium Robertianum.

1. The Stalks grow about two Foot high, the Leaves are a deep grass Green, and the Flowers a reddish Purple.
2. It grows in Hedges & shady Banks, and flowers for most Months in the Summer.
3. This is much of the Nature of Doves-Foot (see Plate 58) being drying & binding, & useful in Wounds & Bruises, as well as in Fluxes. It is particularly commended for ye Kings-Evil, and all scrophulous Swellings, and has done great Service in Nephritic Cases.

Plate 481. Sea Lavender. Limonium & Behen rubrum.

1. The Stalks grow about a Foot high, the Leaves are a grass Green, and the Flower Purple.
2. It grows commonly in Salt Marshes, as below Greenhith, and Gravesend in very great Plenty and flowers in July and August.
3. The Roots and Seed are esteem'd restringent & binding; and good for a Diarrhea, Dysentery, the too great Abundance of the Menses and the Fluor Albus.
4. Greek, Λειμώνιον. Latin, Limonium maritimum majus. Spanish, Espliego de Mar. Italian, Lavanda di Mare. French, Lavande de Mer. German, Dutch, Limoen-kruyd.

Plate 482. Black Poppy. Papaver nigrum.

1. The Stalk grows about three Foot high, the Leaves are a willow Green, and the Flowers a pale Purple with a black Bottom.
2. It is sown yearly in Gardens, and flowers in July.
3. The Heads were formerly used in the Sirupus e Meconio, but are left out in the last Edition of the Dispensatory. The Leaves are used in Cooling Ointments, being accounted good for Burns, Inflammations, and hot Swellings; and are put in the Unguentum Populeon.
4. Greek, Μήκων, μέλας. Latin, Papaver hortense nigro semine. Spanish, Dormidera negra. Italian, Papavero nero. French, Povot noir. German, Schwarter Magsamen. Dutch, Swarte Heul.

Plate 483. White Poppy. Papaver album.

1. The Stalks grow about six Foot high, the Leaves are a pale Green, and the Flowers white.
2. It is sown in Fields and Gardens, and flowers in June.
3. From the Heads of these Poppies (in Turky) the Opium of our Shops is produced; by making Incisions into them, the milky Juice which comes from the Wounds, is soon thickned by the Heat of the Sun, and then gathered and made up into Lumps. Opium is the greatest Anodine we have, easing Pain, procuring Sleep, stopping all violent Evacuations; and is an excellent Medicine in the Hands of a Wise Man; and ought never to be prescribed by any other; many fatal Accidents ensuing from the immoderate or unseasonable Use of it. The Syrupus e Meconio or Diacodium is made of the Poppy Heads dryed, infused & boiled in Water. The Seeds are much used in Emulsions being cooling and good in Fevers, inflammatory Distempers, the Strangury and Heat of Urine.
4. Greek, Μήκων ἥμερος. Latin, Papaver hortense semine albo. Spanish, Dormidera blanca. Italian, Papavero bianco. French, Pavot blanc. German, Weiss Magsamen. Dutch, Witte Heul.

Plate 486. Sumach. Rhus Obsoniorum.

1. This seldom grows to be a tall Tree; the Leaves are a bluish dark Green on the Face, and a light willow Green on the Back, & the Flowers a whitish Yellow.
2. It grows in Italy, Spain and Turky, and flowers in May and June.
3. The Leaves and Seed are accounted restringent and Stiptic, and good for all Fluxes and Haemorrhagies; both used inwardly and outwardly. They are also good to resist Putrefactions and stop Gangreens and Mortifycations. They are used in the Syrupus Myrtinus.
4. Greek, Ροῦς. Latin, Sumach. Spanish, Sumagre. Italian, Somacho. French, Sumac. German, Gerberbaum. Dutch, Smack.

Plate 487. The Oak. Quercus.

1. This grows to be a very tall Tree, the Leaves are a bright grass Green, and the Fruit a brownish Green when ripe.
2. It grows in great plenty in this Country, and its Acorns are ripe in September.
3. The Bark, Buds, Acorns, Cups, and Galls are used; and are accounted Stiptic and binding, and useful in all kinds of Fluxes and Bleedings, either Inward or outward. The Bark is often used for the Relaxation of the Uvula, & for sore Mouths and Throats; and is put in restringent Glysters & Injections against the Prolapsus Uteri or Ani. The Vulgar frequently beat the Acorns to Powder, and take it for Pains in the Side. The Officinal Preparation is the Aqua Germinum Quercus.
4. Greek, Δρῦς. Latin, Quercus latifolia foemina. Spanish, Robre. Italian, Quercia. French, Chesne. German, Eychbaum. Dutch, Eyken-Boom.

Plate 488. Dwarf-Elder. Ebulus.

1. It grows about four Foot high, the Leaves are a light Green, & the Flowers white, with a little Dash of Purple.
2. It grows near Motes and in Hedges; and flowers in May.
3. This is much of the Nature of common Elder (see Plate 151) being good to purge serous watery Humors by Stool, and is therefore good for ye Dropsy and other Distempers arising from a Glut of Serum. It is also useful in Gouty scorbutic Humors, both given inwardly, and applyed outwardly, boiled in a Lixivium.
4. Greek, Καμαιάκτη. Latin, Chamaeacte. Spanish, Hiezguos ó Sabugo pecquenno. Italian, Ebulo ó Nebbio. French, Hieble. German, Niderholler. Dutch, Wilde Olier.

Plate 489. Patience. Lapathum sativum. et Patientia.

1. The Stalks grow about six Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It is planted here in Gardens, and flowers in July.
3. The Root is opening and purging, being somewhat of the Nature of the true Rhubarb, but not so strong; and is often used in Diet-Drinks for the Scurvy, and to open Obstructions of the Liver & Spleen, and help the Jaundice.
4. Greek, Ἱππολάπαθον. Latin, Lapathum hortense. Spanish, Acedera cevada. Italian, Rombice maggiore. French, Patience. German, Munch Rhabarbaren. Dutch, Patientie.

Plate 490. The great Water Dock. Lapathum aquaticum.

1. The Stalks grow about five Foot high, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in Ponds and Ditches, flowring in July.
3. There is a particular Treatise wrote on this Plant, by Muntingius, who supposes it to be the Britanica of the Ancients, and attributes to it all the Virtues that they ascribe to their Britanica; as being of great Service against the Scurvy & all its Symtoms, as Ulcers in the Mouth and Gums, Loosness of Teeth, Pains in the Limbs, as likewise against all kinds of Fluxes, the Dropsy and Jaundice.
4. Greek, Ὑδρολάπαθον. Latin, Hydrolapathum. Spanish, Acadera agatila. Italian, Lapatio aquatico. French, Lapais aquatique. German, Mengernwurt. Dutch, Water Patich.

Plate 491. Sharp-pointed Dock. Lapathum acutum.

1. The Stalks grow about three Foot high, the Leaves are a grass Green, and the Flowers a greenish Yellow.
2. It grows common in moist Places, and flowers in June.
3. The Roots are accounted aperative & cooling, and much used to purify and cleanse the Blood from salt sharp Humours; and are good for the Scurvy, Rheumatism, and all manner of itchy scabby Eruptions, for which Purpose they are frequently put in Diet-Drinks & apozems, and used outwardly in Ointments. The Seed is drying and binding, good to stop spitting of Blood, and Haemorrhagies of all Kinds.
4. Greek, Ὀξυλάπαθον. Latin, Oxylapathum. Spanish, Labara. Italian, Lapatio. French, Lapais, ou Pareile. German, Streiffwurt. Dutch, Wilde Patich.

Plate 492. Bloodwort. Lapathum sanguineum.

1. The Stalks grow about three Foot high, the Leaves are a grass Green, veined with Red, and the Flowers a pale Green.
2. It is planted in Gardens, and flowers in June.
3. Matthiolus, says this has the same Qualities as the Sharp-pointed Dock; only he prefers it to the former in all sorts of Fluxes & Haemorrhagies.
4. Greek, Ἐρυθρολάπαθον. Latin, Lapathum folio acuto rubente. Spanish, Labara roxa. Italian, Lapatio rosso. French, Lapais rouge. German, Drachenblut. Dutch, Bloedkruyd.

Plate 493. Logwood. Lignum Campechianum.

1. This grows to be a large Tree in its Native Climate, the Leaves are a dark grass Green, and the Flowers a pale Purple.
2. It grows in the Island of Campeachy in great Plenty.
3. The Extract of this Wood is lately found to be very helpfull in Fluxes of the Belly.
4. Greek Latin, Lignum Campechianum. Spanish, Palo de Campeche. Italian, Legna di Campeche. French, Bois de Campeche. German, Dutch,

---

Plate 494. The Sloe-tree. Prunus sylvestris.

1. It grows to be eight or ten Foot high, the Leaves are a deep grass Green and the Flowers white.
2. It grows common in Hedges, and flowers in March.
3. The Fruit is esteemed restringent and binding, good for all kinds of Fluxes and Haemorrhagies. It is of great service in Gargarisms for sore Mouths and Gums; and good to fasten loose Teeth. The Juice of the Sloes, boiled to a Consistence is what is now used for the true Acacia Germanica of the Shops.
4. Greek, Κοκκύμηλον ἀγρία. Latin, Prunus sylvestris. Spanish, Ciruelo silvestre. Italian, Prugnole salvatiche. French, Prunier sauvage. German, Schlehendorn. Dutch, Wilde Pruym Boom.

Plate 495. Liquorice. Glycyrrhiza.

1. The Stalks grow about three Foot high, the Leaves are a light grass Green, and the Flowers a pale Purple.
2. It is planted in Fields and Gardens, and flowers in June.
3. The Roots are pectoral, and of great Use in Distempers of the Lungs as Coughs and shortness of Breath; and likewise in nephritic Affections, as Stone, Gravel, stoppage & Heat of Urine, and Ulcers in the Kidneys.
4. Greek, Γλυκυῤῥίζα. Latin, Liquiritia. Spanish, Regaliza. Italian, Regolitia. French, Regalisse. German, Lectric. Dutch, Socthout.

Plate 496. Angelica. Angelica.

1. The Stalks grow about five Foot high, the Leaves are a light grass Green, and the Flowers white.
2. It is planted in Gardens flowring in June.
3. It is accounted Stomachic, cordial & alexipharmic; and of great Use in all malignant pestilential Fevers, & all contagious Distempers even the Plague it self. It causes Sweat, & drives out all noxious Humors through the Pores of the Skin. It is very serviceable in Disorders of ye Womb & Hysteric Affections; it provokes Urine and the Catamenia, & expells the Secondines. The Roots Stalks & Leaves are used. The Officinal Preparations are a Simple & Compound Water, and the Stalks candied.
4. Greek, Latin, Angelica sativa. Spanish, Angelica. Italian, Angelica. French, Angelique. German, Angelick. Dutch, Tamme Angelica.

Plate 497. The Yellow Water-Lilly. Nymphaea lutea.

1. The Stalks on which the Flowers grow are about three Foot long, the Leaves are a grass Green, and the Flowers yellow.
2. It grows in Rivers and large Lakes, flowring in June and July.
3. It is accounted cooling and anodyne, and good in dilerious Fevers, and for the Heat and Sharpness of Urine, and all kinds of Fluxes and Loosnesses.
4. Greek, Νυμφαία ἑτέρα. Latin, Nymphaea major lutea. Spanish, Lirio amarillo del Rio. Italian, Nimphea gialla. French, Lis jaune de Stagn. German, Ellr Seeblumen. Dutch, Plompen.

Plate 498. The White Water-Lilly. Nymphaea alba.

1. The Stalks grow about three Foot long, the Leaves are a grass Green, and the Flowers white.
2. It grows in Rivers, and flowers in June and July.
3. The Root and Flowers are esteem'd cooling and drying, and good to stop all kinds of Fluxes, a Gonorrhaea and nocturnal Pollutions, by their softning cooling Qualities, allaying the Acrimony of the Seed, and thereby rendering Persons less enclined to Venery. The Leaves are good to be applyed to hot Tumors and Inflammations.
4. Greek, Νυμφαία. Latin, Nenuphar. Spanish, Lirio blanco del Rio. Italian, Nimphea bianco. French, Lis blanc d'Eau. German, Weiss Seeblumen. Dutch, Witte Plompen.

Plate 499. Water-Lilly Roots. Nymphaeae Radices.

1. The Root of the Yellow Water Lilly is about ten or twelve Inches in Circumference, and full of Fibers, which stick very deep in the Ground. Both the outside and inside are of a whitish Colour.
2. The Root of the White Water Lilly grows bigger than that of the yellow, but has fewer Fibers, and grows deep in the Ground. The outside of the Root is a deep Black, and the inside is White.

Plate 500. Buglos. Buglossum.

1. The Stalks grow about three Foot high, the Leaves are a bright grass Green, and the Flowers a red Purple when young, and a deep Blue when they are blown two or three Days.
2. It is planted in Gardens and flowers in June and July.
3. This Plant is much of the Nature of Borrage (see Plate 36) being accounted cordial, and good to exhilerate the Spirits and drive away Melancholy, and is useful against Hypocondriac and Hysteric Disorders. The Flowers are one of the Four cordial Flowers.
4. Greek, Βούγλωσσον. Latin, Buglossum angustifolium majus. Spanish, Buglosa. Italian, Buglossa. French, Buglose. German, Ochsentunge. Dutch, Ose-tong.
